

EXPERTLY DESIGNED, DELIVERED TO PERFORM

Powered by nearly 70 years of relentless problem-solving and steadfast reliability, Bishop-Wisecarver delivers innovative motion solutions around the world that thrive in harsh and extreme conditions. Our linear and rotary motion solutions, custom complex assemblies, and embedded intelligence systems lead the manufacturing industry, and they are backed by The Signature Experience promise of expert guidance, confidence and customer satisfaction.

PERFECT FOR HARSH AND EXTREME ENVIRONMENTS

When you purchase from Bishop-Wisecarver, you aren't just getting a product that works; you're getting products, systems, and industry-leading expertise you can trust, especially in harsh conditions and critical environments—always exceeding our customers' reliability requirements.

Our Motion Products and Solutions Are Also Perfect For:

HARSH ENVIRONMENTS

LONG LENGTH

LOW NOISE

HIGH/LOW TEMPERATURE

LOW TOTAL COST OF OWNERSHIP

SMOOTH, LOW FRICTION MOTION

MOIST ENVIRONMENTS

FOOD GRADE

CLEAN ROOM

VACUUM

INTRODUCTION

UtiliTrak® linear guides are designed for commercial applications where easy installation and minimal maintenance requirements are the primary design objectives. It is constructed with DualVee Motion Technology® in the vee and vee/crown wheel, or the MadeWell® crown roller designs. These, along with a variety of material and seal options, provides high reliability, easy installation and low maintenance solutions in a sleek, compact design.

Fit up is pre-set for PW, SW, and CR wheel plates when ordered with matching linear guide tracks, but is easily adjusted by rotating the eccentrically mounted center guide wheels. This allows modification of running characteristics such as drag, breakaway force and preload. The VC series wheel plates are not pre-set.

Each wheel plate assembly includes a standard channel lubricator, which distributes a light coat of oil along the length of the channel during normal operation. Channels can be butt-joined for unlimited travel lengths.

Design Benefits

- Very low rolling friction
- Ground channel butt-joint
- Butt-joining precision ground channel for unlimited travel lengths
- High load capacity
- Contamination tolerant
- Low maintenance
- Simple installation

Key Industries

- Architecture
- Automotive
- Medical
- Packaging
- Printing
- Pharmaceutical

UTILITRAK® SERIES COMPARISON

PW Crown Wheel Plate in C Channel

SW Wheel Plate with Vee Wheels in Vee Channel

VC Wheel Plate in Vee Channel

CR Wheel Plate in Composite Channel

PW SERIES

The UtiliTrak® PW Series are linear bearings made with Madewell® polymer guide wheels and matching extruded aluminum linear guide track channels. The pairing of wheel plate with channel are designed and built of materials for lighter load capacities, but highly corrosive environments.

Design Benefits

- Light to medium duty applications
- Ease of installation
- Tolerates up to 7° of angular misalignment
- Eccentric bearing for easy wheel plate adjustment
- Low noise
- High speed capacity
- Smooth anti-friction operation
- Butt-joining extruded channel for unlimited travel lengths

Key Industries

- Food Product Processing
- Agriculture
- Medical
- Testing Laboratories
- Diagnostic Substance Mfg.
- Paper/Pulping

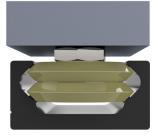

Application Examples

- · Agrochemical (liquid fertilizer) filling
- Liquid medicine & cleaning wash
- High impact cleaning spray nozzles in paper production

For instructions regarding mounting and orientation, life estimation, preloading, and maintenance, see the UtiliTrak section of the Technical Data catalog.

PW SERIES

Application Examples

Laboratory Liquid Dispensing

Multi-axis laboratory automation for high throughput fluid pipetting. The small footprint linear guides are made from corrosion resistant aluminum, stainless steel, and polymer wheels that are well suited for lightweight tabletop instrumentation and low contamination but highly corrosive environments.

Clear Anodized Channel Stock Code

C Channel	90° Vee
UTTRA0 (L) (M)	UTTA0 (<i>L</i>) (<i>M</i>)
UTTRA1 (L) (M)	UTTA1 (L) (M)
UTTRA2 (L) (M)	UTTA2 (L) (M)

(*L*) is channel length in mm with 1 decimal place (up to 3600.0 mm); butt-join channel for unlimited travel lengths.

(*M*) is custom Hole to End space for one end in mm with 1 decimal place (9.0 to 72.0 mm). Leave blank for default value on both ends.

Example: UTTRA1 2160.0 20.5 Example: UTTA2 1030.5

To Calculate Hole to End Space (Dimension M)

Step 1: Calculate number of hole spaces

 $\frac{\text{(Length in mm - X)}}{80} = \text{# of hole spaces (round down to nearest whole number)}$

X = 14 X = 16 X = 18 (size 0) (size 1) (size 2)

Step 2: Calculate sum of end spaces

 $\frac{\text{Length in mm - (\# of spaces x 80)}}{2} = \text{Sum of end lengths}$

Step 3: Calculate M

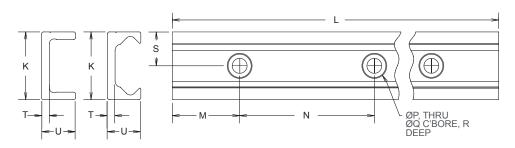

By default M = (Sum of end spaces)

2

If specifying a custom M, the other end space is (Sum of end spaces) - (Specified end space M).

The UtiliTrak® SW Series are linear bearings with a wide variety of steel and stainless steel DualVee® guide wheels and MadeWell® crown rollers, and matching precision ground channels designed to withstand heavy load capacity requirements in compact spaces and where challenging environmental conditions such as washdown, or high contamination or debris exist.

Design Benefits

- Medium to heavy duty applications
- Eccentric bearing for easy wheel plate adjustment
- Ease of installation
- Low noise
- High speed capacity
- Smooth anti-friction operation
- Butt-joining drawn and extruded channel for unlimited travel lengths
- Tolerates up to7° of misalignment
- Special bearing options to suit the environment

Key Industries

- Aeronautical
- Cutting, Slicing, & Slitting
- Food Processing
- Medical
- Packaging
- Welding
- Pharmaceutical
- Search, Detection, & Scanning
- Transportation

Application Examples

- Adjustable seats
- Equipment trays and slide-outs
- Adjustable position & lock mechanisms
- Material processing & handling equipment

For instructions regarding mounting and orientation, life estimation, preloading, and maintenance, see the UtiliTrak section of the Technical Data catalog.

Application Examples

Machine Tool Doors

The UtiliTrak® SW Series linear guides are used on the sheet metal door structure of a machine tool. Several wheel plates are attached to the large structure to provide smooth and reliable motion within the debris contaminated environment.

Spindle Assembly

The UtiliTrak® SW Series can be used on the vertical z-axis of a CNC routing machine to guide the routing spindle. The machine utilizes a combination of channel profiles to prevent binding in the spindle assembly with a vee channel with vee guide wheels on one side, and a C channel with crown rollers on the opposite side.

Wheel Plate Max Load CapacitySee the Technical Data catalog page 24 - 26 for sizing/selection and life estimation.

Clear Anodized Channel Stock Code

C Channel	90° Vee
UTTRS1 (<i>L</i>) (<i>M</i>)	UTTS1 (<i>L</i>) (<i>M</i>)
UTTRS2 (<i>L</i>) (<i>M</i>)	UTTS2 (<i>L</i>) (<i>M</i>)
UTTRS3 (L) (M)	UTTS3 (L) (M)

(L) is channel length in mm with 1 decimal place (up to 3600.0 mm); butt-join channel for unlimited travel lengths.

(M) is custom Hole to End space for one end in mm with 1 decimal place (9.0 to 72.0 mm). Leave blank for default value on both ends.

Example: UTTRS1 2160.0 20.5 Example: UTTS2 1030.5

To Calculate Hole to End Space (Dimension M)

Step 1: Calculate number of hole spaces

(Length in mm - X) = # of hole spaces (round down to nearest whole number)

X = 14X = 16X = 18(size 0) (size 1) (size 2)

Step 2: Calculate sum of end spaces

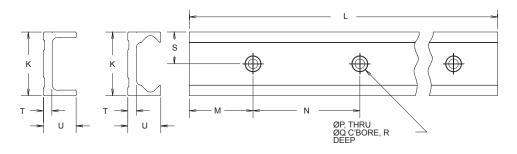

Length in mm - (# of spaces x 80) = Sum of end lengths

Step 3: Calculate M

By default M = (Sum of end spaces)

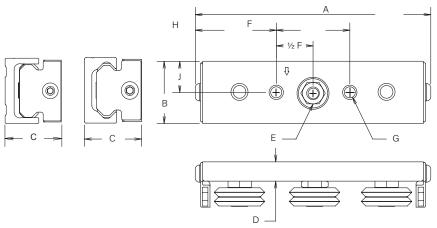

If specifying a custom *M*, the other end space is (Sum of end spaces) - (Specified end space *M*).

Dimensions are shown in inch and [millimeter] values Wheel plate is representative of both DualVee wheels and MadeWell crown rollers Drawings are not to scale

The UtiliTrak® VC is a compact hybrid design of the DualVee® wheels and MadeWell® crown rollers perfect for commercial applications. It highlights the ease of selection by seamlessly pairing with both vee and C channel profiles to fit your application.

Design Benefits

- Ease of installation
- Versatility between vee and C channel profiles
- Up to 2° misalignment
- Eccentric bearing for easy wheel plate adjustment
- Very low rolling friction operation
- Low noise
- · High speed capacity
- Butt-joining precision ground channel for unlimited travel lengths

Key Industries

- Aerospace
- Architecture
- Automotive
- Medical
- Packaging
- Printing

Application Examples

- Sliding doors, windows, & partitions
- Adjustable and movable walls and furniture for reduced square footage
- Adjustable seats
- Equipment trays and slide-outs
- · Material handling equipment
- Product indexing, cartoning and packaging

For instructions regarding mounting and orientation, life estimation, preloading, and maintenance, see the UtiliTrak section of the Technical Data catalog.

Application Examples

Medical Table

The UtiliTrak® VC Series is a compact solution perfect for applications such as medical tables that need to be able to adjust and move with limited space.

acts as a guide when utilizing the wheel plate as a method for pushing material towards a saw. A hand brake is added for manually setting the braking point.

Wheel Plate Max Load Capacity

See the Technical Data catalog page 24 - 26 for sizing/selection and life estimation.

UTTRS1 (<i>L</i>) (<i>M</i>)	UTTS1 (L) (M)
UTTRS2 (L) (M)	UTTS2 (L) (M)
UTTRS3 (<i>L</i>) (<i>M</i>)	UTTS3 (L) (M)

(*L*) is channel length in mm with 1 decimal place (up to 3600.0 mm); butt-join channel for unlimited travel lengths.

(*M*) is custom Hole to End space for one end in mm with 1 decimal place (9.0 to 72.0 mm). Leave blank for default value on both ends.

Example: UTTRS1 2160.0 20.5 Example: UTTS2 1030.5

To Calculate Hole to End Space (Dimension M)

Step 1: Calculate number of hole spaces

 $\frac{\text{(Length in mm - X)}}{80} = \text{\# of hole spaces (round down to nearest whole number)}$

X = 14 X = 16 X = 18 (size 0) (size 1) (size 2)

Step 2: Calculate sum of end spaces

Length in mm - (# of spaces x 80) = Sum of end $\frac{1}{2}$ lengths

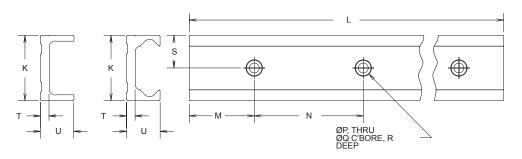

Step 3: Calculate M

By default M = (Sum of end spaces)

2

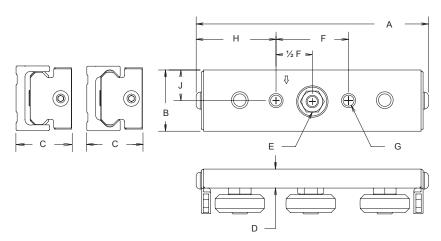

If specifying a custom M, the other end space is (Sum of end spaces) - (Specified end space M).

CR SERIES

The UtiliTrak® CR Series has been designed and engineered as a corrosion resistant stainless steel guide wheel plate paired with composite channel with aluminum base and polished stainless steel track. It is ideal for medium to heavy duty transport applications where corrosion resistance is required.

Design Benefits

- Medium to heavy duty applications
- Eccentric bearing for easy wheel plate adjustment
- Ease of installation
- Low noise
- Corrosion resistant
- Very low rolling friction operation
- Low noise
- High speed capacity
- Butt-joining precision ground channel for unlimited travel lengths
- Food processing compatible and meets FDA standard

Key Industries

- Food Processing
- Vertical Farming
- Nuclear
- Cutting

Application Examples

- Chicken cutting, slicing, and processing with regular chemical washdowns
- Automated or manual pool cover
- Chemical dipping & coating
- Envelope accumulator

For instructions regarding mounting and orientation, life estimation, preloading, and maintenance, see the UtiliTrak section of the Technical Data catalog.

CR SERIES

Application Examples

Envelope Sorter

The UtiliTrak® CR Series linear guides are available with long single-piece channel lengths that are ideal for bulk processing and production equipment. This machine uses a parallel pair of CR series linear guides to control the outflow of envelopes and paper products.

Chemical Dipping

UtiliTrak® CR Series with corrosion resistant stainless steel components is used as a linear guide for supporting fragile but heavy loads as they are lowered into a barrel of chemicals for a treatment process.

Wheel Plate Max Load CapacitySee the Technical Data catalog page 24 - 26 for sizing/selection and life estimation.

Wheel Plate Hand Brake

- Compact system ideal for applications where handle arm access space is limited
- Brake system allows steel (VC and SW series) and aluminum (PW series) UtiliTrak® wheel plates to be manually locked at any user-selected position on vee and C channel
- Brake block fabricated from aluminum and hard anodized for corrosion resistance, abrasion resistance, good gripping/braking action, and long life
