Introducing the new READY2RUN CAT4 LTE cellular router kits for your IIoT applications. They include everything you need for remote machine monitoring and troubleshooting. Just power it up, pop on the antenna, connect your edge device, and you're ready to go! The kits are ideal for simple cellular backup connection, sending data to an online database, or a connection to AWS, Azure, Bluemix, or Google. Use with your cellular data plan or with our 12 month 1GB/mo Verizon data plan.
