

Drive efficiency and cash flow with seamless payments integration

Versapay's direct integration with Microsoft Dynamics 365 connects your AR department with your customers over the cloud and enables you to accept payments securely with all your data in one place.

Outcomes achieved by Versapay Clients

30% Reduction in manual AR processes

20% Average savings on payment processing fees

25% Acceleration in payment collection

“As the leading Dynamics integration software for payment processing, Versapay *creates a smaller margin of error* because everything is available in one, centralized location. *Credit card payments and refunds are handled with ease* directly inside Microsoft Dynamics.”

Riyad Deen, VP of Global Technology for Aden and Anais

Features & Benefits

Streamline invoicing & increase efficiency

- Collect payments directly in Business Central and make it part of your native ERP workflows, limiting the need for training.
- Auto-reconciliation from acceptance, to posting to cash receipt journal balancing.
- Research is easy with all payment data in your ERP.

Improve cash conversion & lower processing costs

- Accept and process payments across all sales channels—e-commerce, retail, and the back office.
- Accept credit cards, debit cards, gift cards, checks, bank payments, and PayPal. Chip and PIN/EMV capable.
- Minimize fees with Interchange Optimization and Level II and III processing.

Reduce risk & avoid payments fraud

- Securely process online orders from cart to cash.
- Tokenized and encrypted sensitive credit card data.
- PCI validation protects you, your customers and helps reduce fraudulent chargebacks.
- Payment processing software plus services in one.
- Transactions are retained for future or repeated authorization and settlement.
- 24x7 access to online portals for all payment processing data, reporting tools, and dispute management.
