## Features & Benefits

### Streamline invoicing & increase efficiency

- Collect payments directly in NetSuite and make it part of your native ERP workflows, limiting the need for training.
- Auto-reconciliation from acceptance, to posting to cash receipt journal balancing.
- Research is easy with all payment data in your ERP.

### Improve cash conversion & lower processing costs

- Accept and process payments across all sales channels—e-commerce, retail, and the back office.
- Accept credit cards and bank payments.
- Minimize fees with Interchange Optimization and Level II and III processing.

### Reduce risk & avoid payments fraud

- Securely process online orders from cart to cash.
- Tokenized and encrypted sensitive credit card data.
- PCI Validation protects you, your customers and helps reduce fraudulent chargebacks.
- Payment processing software plus services in one.
- Transactions are retained for future or repeated authorization and settlement.
- 24x7 access to online portals for all payment processing data, reporting tools, and dispute management.

“[Versapay] has made a huge impact here. Not only have they *reduced our costs* dramatically, but they have also *eliminated manual processes* I thought would never go away. *their technology is years ahead of the competition.* I am not surprised at all with their recent Innovator of the Year award from NetSuite.”
