AI-Powered Video Analytics

The Vintra video analytics solution delivers real-time, total-environment intelligence and accurate post-event search from any camera source. Our cutting-edge AI works on footage from both fixed and mobile cameras, and integrates with popular video management solutions. Vintra augments human resources by enabling faster, better-informed responses to critical events through actionable, tailored and trusted intelligence.

Real-Time Intelligence

Leverage a robust rules engine to set alarms for specific objects and object attributes, blocklists, intrusions and more. FulcrumAI delivers totalenvironment awareness from any camera source.

Force Multiplying Tech

Monitor and search hundreds or thousands of cameras 24x7 using purpose-built AI.

Post-Event Analysis

Improve investigations by 20x, repurpose thousands of man-hours, and collect video from the public with a click of the button. Powerful features include face identification, biometric, object, and attribute search capabilities.

Face Recognition (Optional)

Whether searching one-to-one or one-to-many, our face rec has been built to work in challenging video scenarios, including mobile surveillance. This is an optional feature than can be turned on/off.

Real-Time Alerts	Lightning Fast Video Search	Robust Rules Engine	Camera Agnostic

Proactive Prevention and Total Environment Intelligence

Any Video, Many Codecs
Unlike legacy video analytics, Vintra works on any type of video, from both fixed and mobile cameras, and nearly any codec when searching video clips.

Real-Time, Real Results
Transform live-monitoring into smartmonitoring with Vintra. Better rules and smarter alerts increase operational efficiencies and enable security professionals to focus on active engagement and prevention.

Any Video, Many Codecs
Unlike legacy video analytics, Vintra works on any type of video, from both fixed and mobile cameras, and nearly any codec when searching video clips.

Core Features

Lightning Fast Search—Close cases faster by accurately searching hours and days of multiple cameras for objects, people and events that matter.

Powerful Rules & Smart Alerts—Detect security threats and safety events through a powerful rules engines that monitors cameras 24/7 and sends alerts to popular VMS systems.

Total Situational Awareness—Leverage Vintra's technology to find the current and past detections of a specific person and vehicle instantly across all camera feeds in a privacy-protected manner.

Purpose-Built AI For Next-Generation Security And Safety—Leverage Vintra's industry-leading AI to detect objects like face coverings, weapons and events like people down on the ground.

Powerful Software + Hardware + Support
The Vintra Solution is Available in an All-In-One Appliance

We make it easy to add AI-powered video analytics to any existing camera.
