**The world turns
at an unprecedented pace**

From....

mass production
products
buying items
needs
data creates chaos
reactive processes & systems
thinking industries

....to

mass customization,
services
using items
experience
data drives decisions
thinking processes & systems
leapfrogging industries

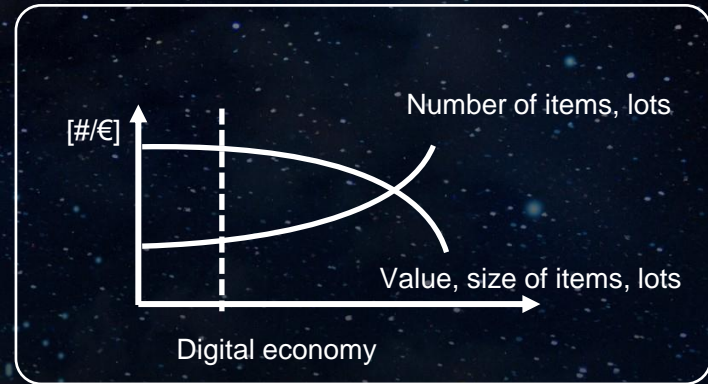

... amplified
by **COVID-19 crisis**

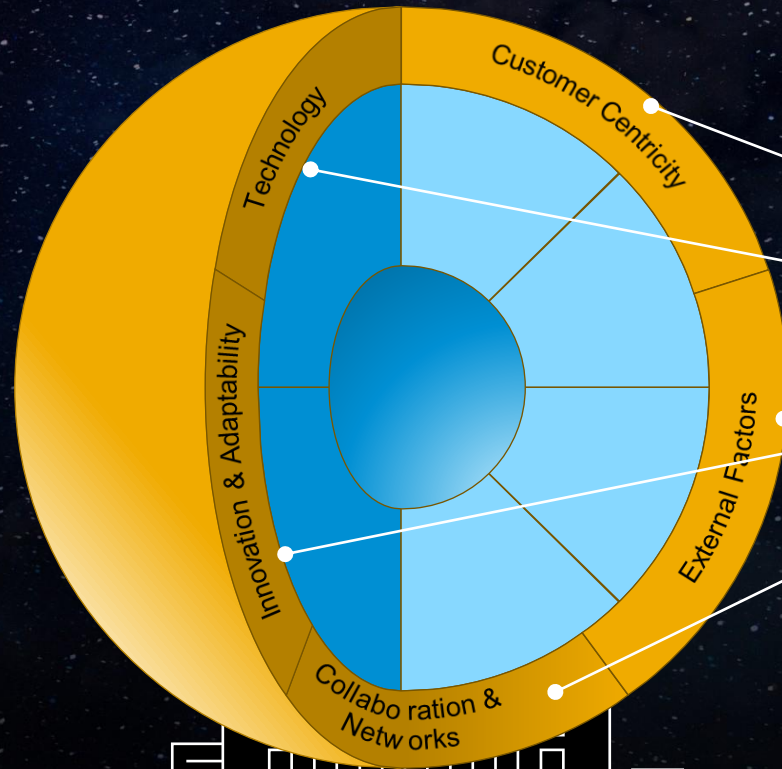

Hyper-individualization and mass customization of services

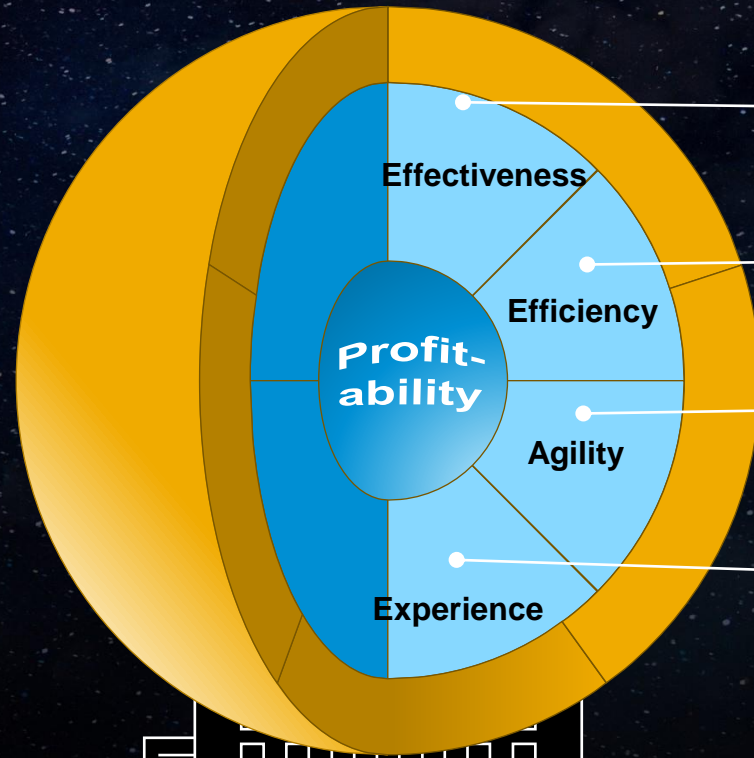

Consequences for the Enterprise

Resilience

Increase effectiveness

“Doing the right thing”

Increase efficiency

“Doing things right”

Increase agility

“Speed and flexibility”

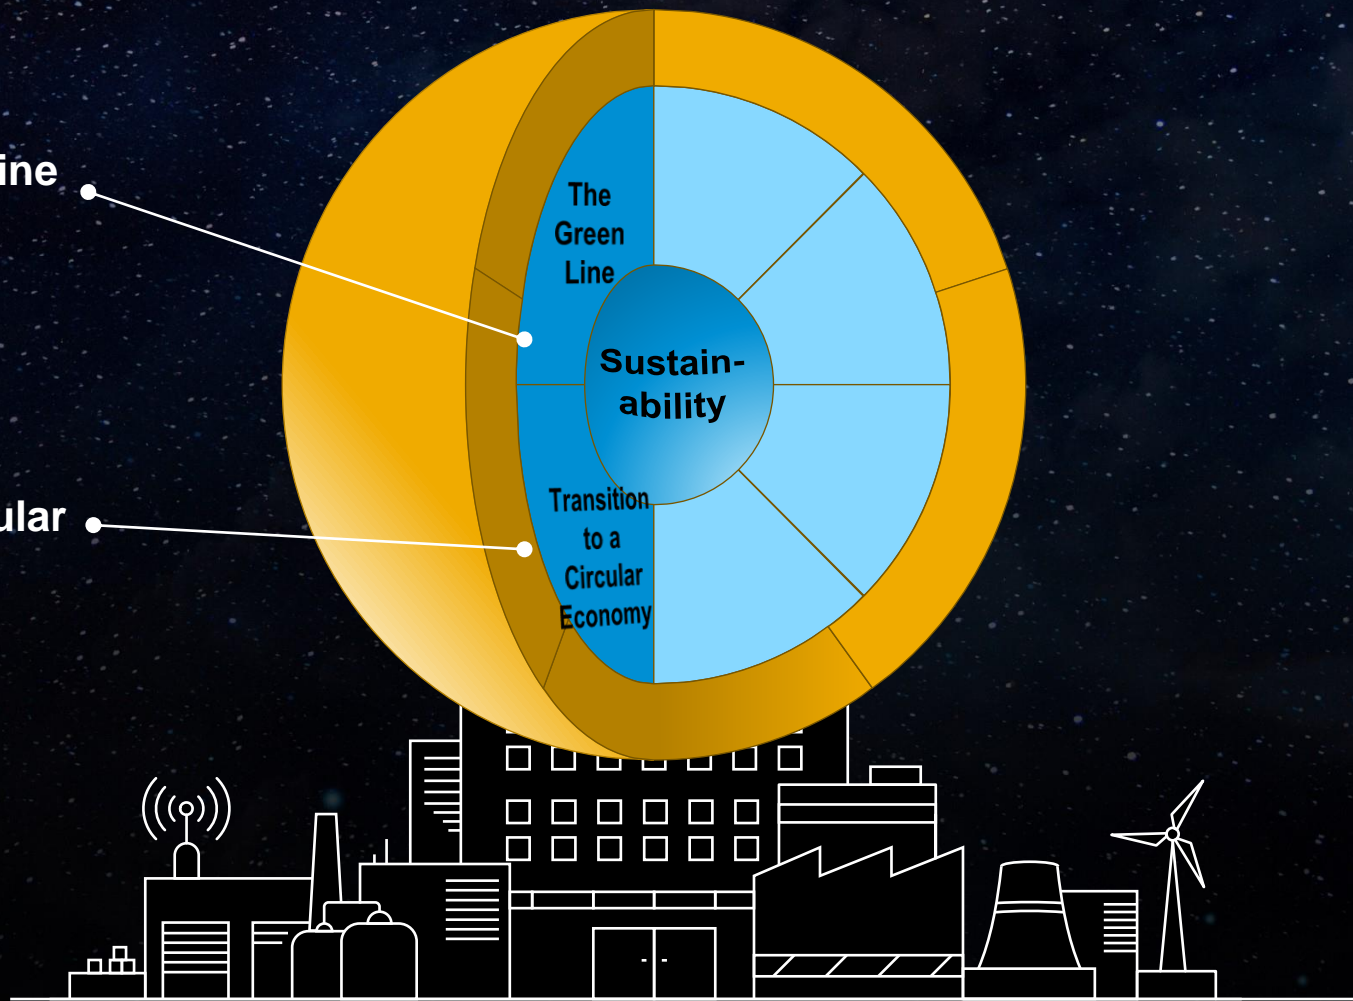

Increase experience

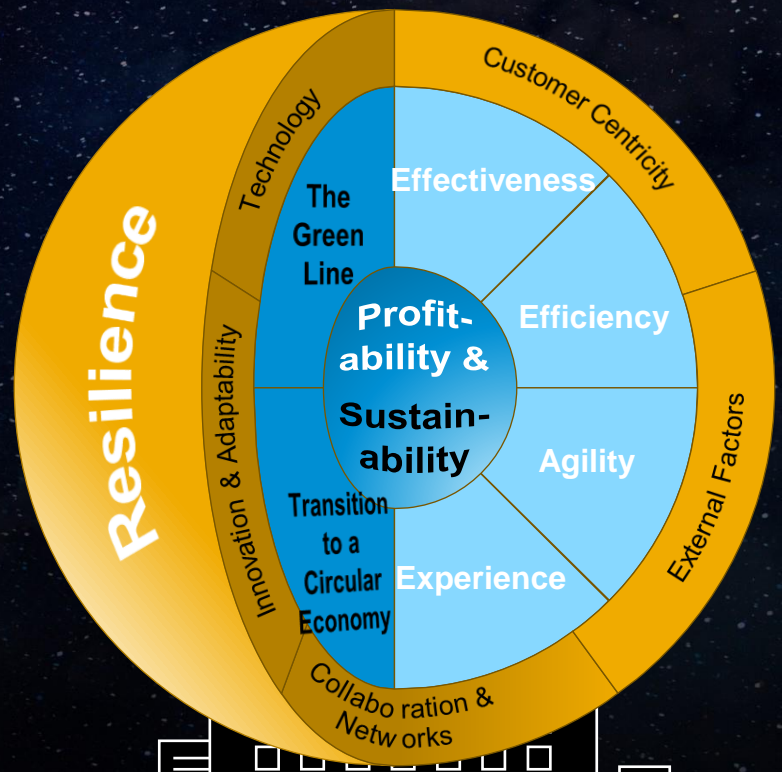

“User satisfaction & loyalty”

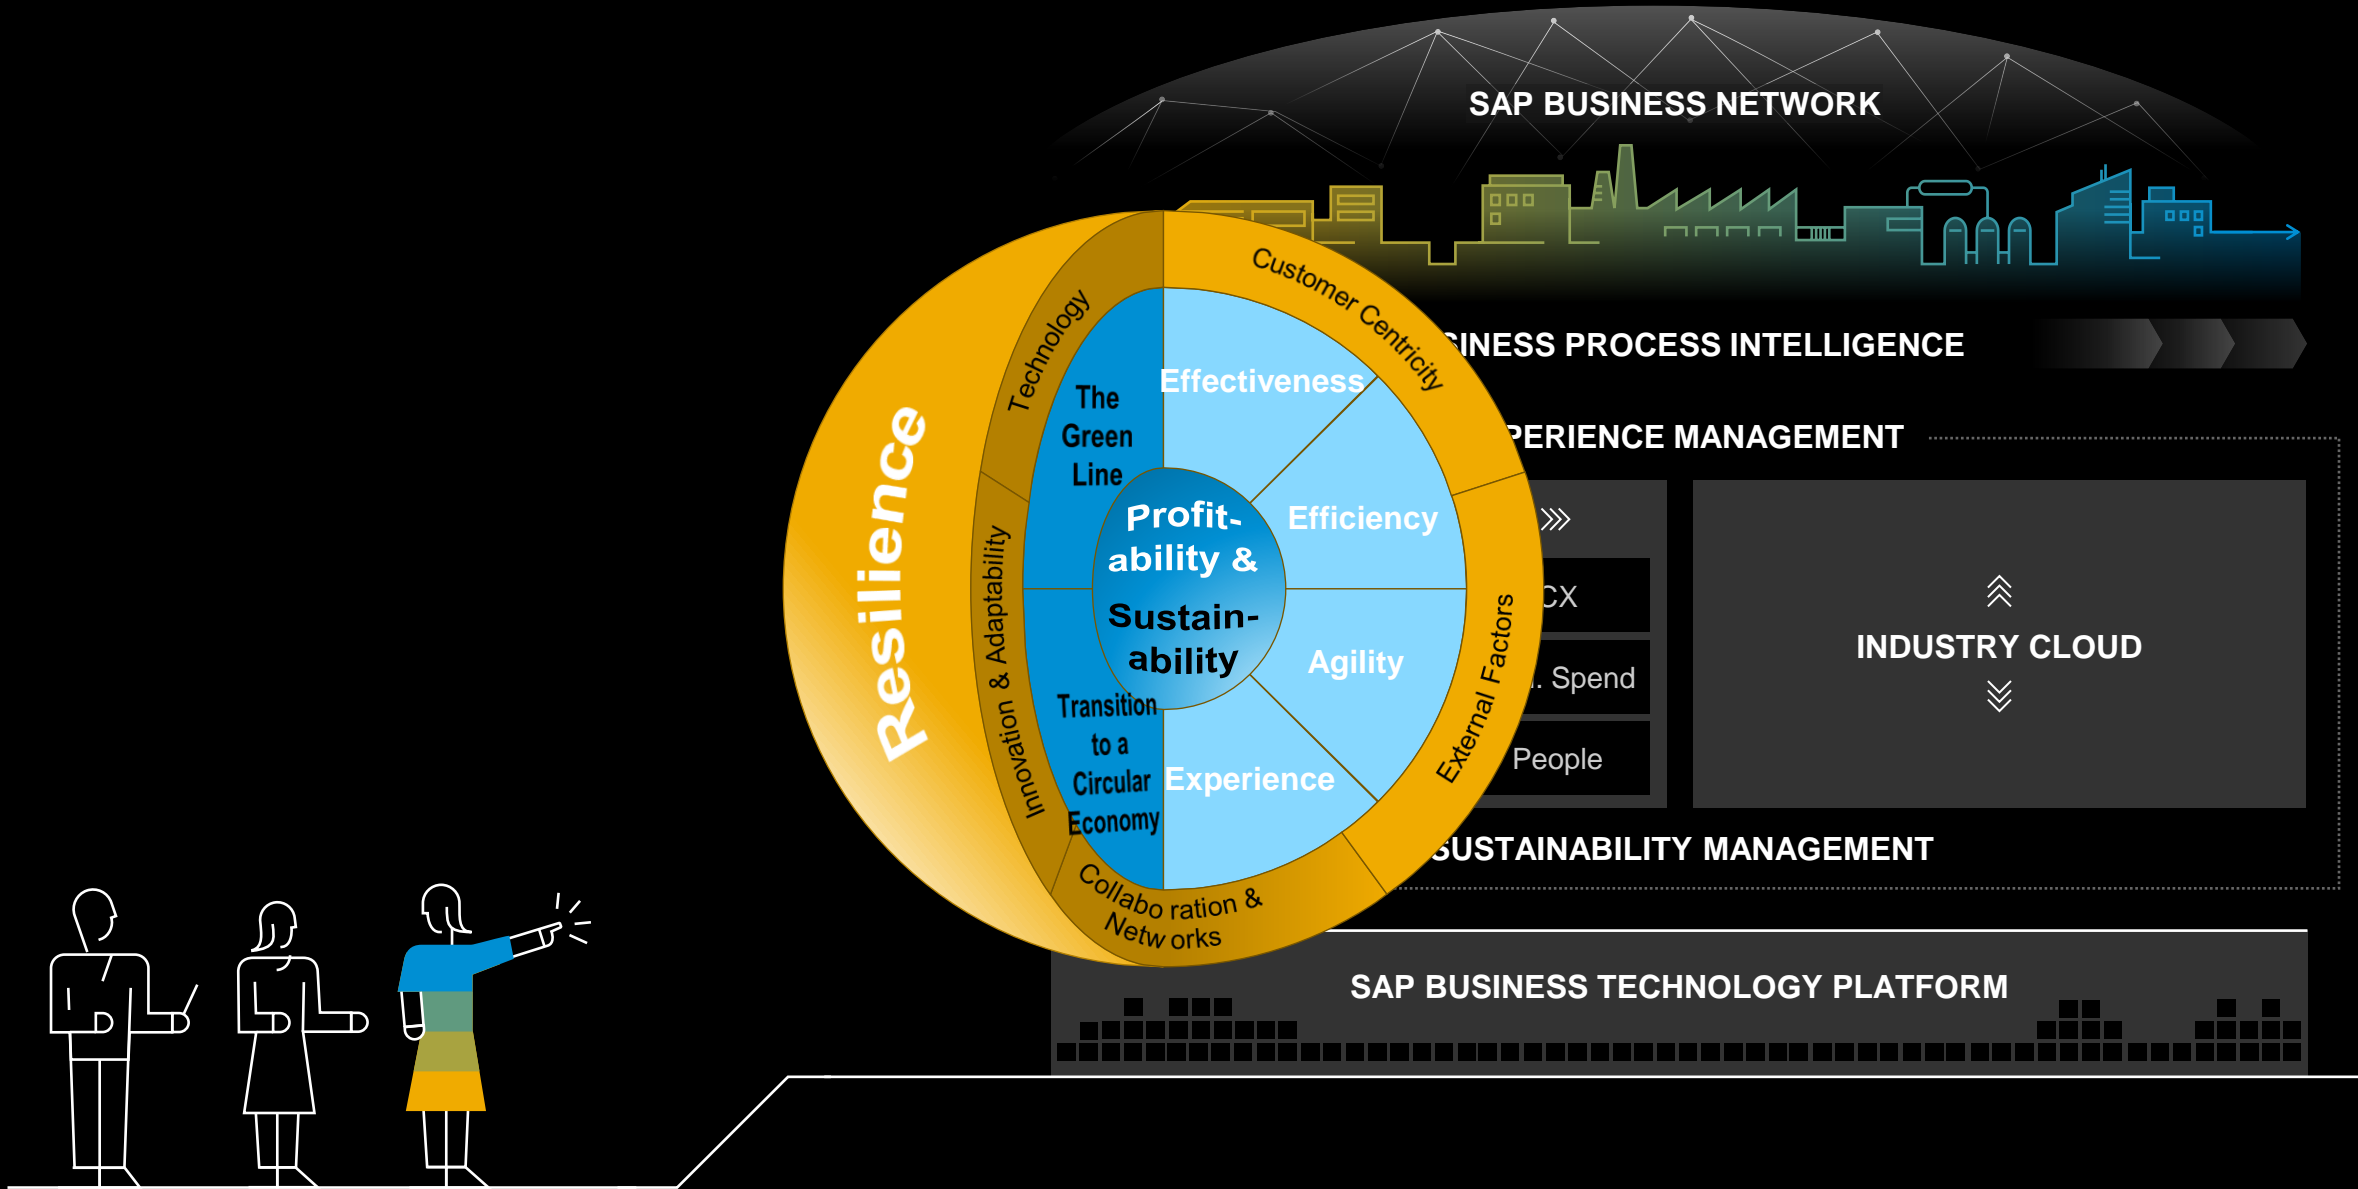

The Green Line

Transition to a Circular Economy

How does it relate to cloud?

Massive modifications have pushed many ERP customers past the point of **no return**

Examples of transformation journeys ([link](#))

Sins of past ERP implementations

- Only 20% of existing modifications might be used
- How does one identify and eliminate the 80% of modifications not used anymore or never been used?
- Even if these modifications are identified, there are still probable risks of hidden dependencies
 - Upgrade projects
 - Falling behind on upgrades and enhancement package implementations

Massively modified systems have become unsustainable to the point where...

... IT spends a high percentage of their resources on keeping the lights on.

Trusco Nakayama Corporation,
a leading Japanese wholesaler

- 2.3 million products, inventory stocked with 390,000 items, at an achieved inventory hit rate of 90%
- Automating: automatic processing of 50,000 quote requests each day
- SAP S/4HANA Cloud extended with custom applications leveraging SAP Business Technology Platform

Mitsui and Co. Ltd.,
a global leader in manufacturing

- Customer with traditional, strong, and “state-of-the-art” IT environment
- Transforming in the wake of the intelligent era
- Stronger adoption of global standards, like IFRS, resulting in significant speed up of financial management reporting
- Improvement of operational and financial performance across the growing group

The potential of intelligent technologies is everywhere

Supply chain

At least **50%**

of large global companies will be using **AI, advanced analytics and IoT** in **supply chain operations** by 2023.¹

Procurement

Almost **60%**

of individual tasks involved in the source-to-pay process have the potential to be **fully or largely automated** using currently available technologies.²

Manufacturing

76%

of manufacturers either have a **smart factory** initiative that is ongoing or are working on formulating it.³

Finance

Yet about **50%**

of the overall time of the workforce in finance and insurance is devoted to collecting and processing data, where the **potential for automation is high**.⁴

Sales

30%

of all B2B companies will employ some kind of **AI to augment** at least one of their **primary sales processes**.⁵

Asset management

On average **70%**

reduction of breakdowns though the application of **predictive maintenance**⁶

The Intelligent Enterprise: Efficiency and Effectiveness

Cash Management

Traditional world

Cash management the traditional way

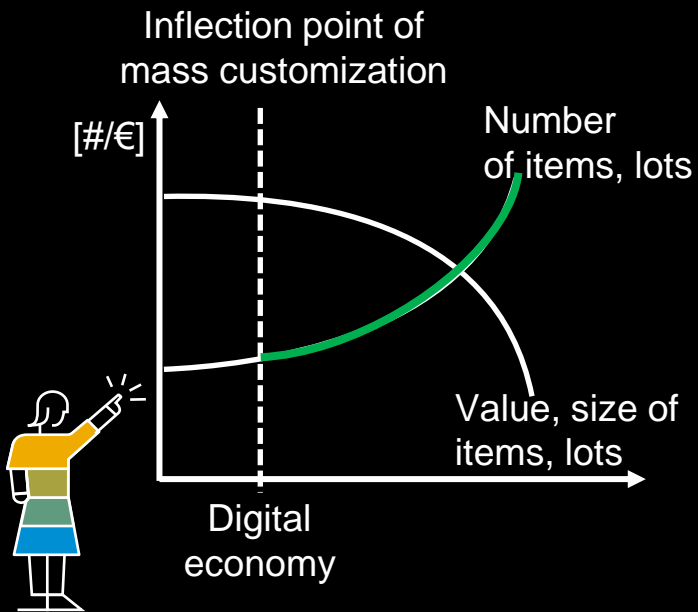

The traditional way is typically efficient
The new enterprise reality demands increased effectiveness

The Intelligent Enterprise: Efficiency and Effectiveness

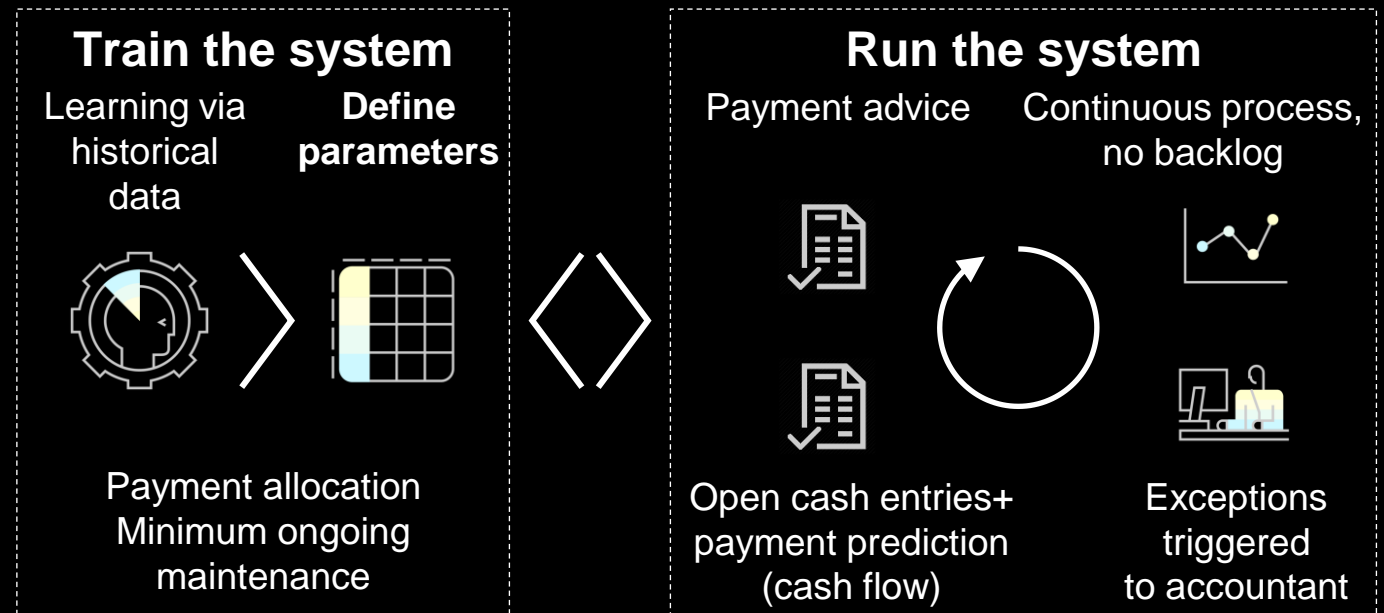

Effectiveness: example cash application

Digital Economy

Real-time monitoring and automation allows running the processes at scale with increased transparency and a reduced error rate.

Cash management based on intelligent technologies

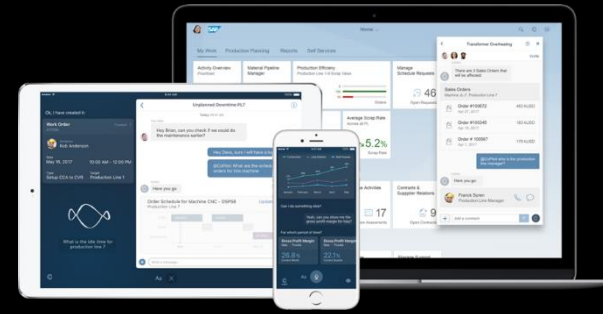

The future of work in a hyper automated world

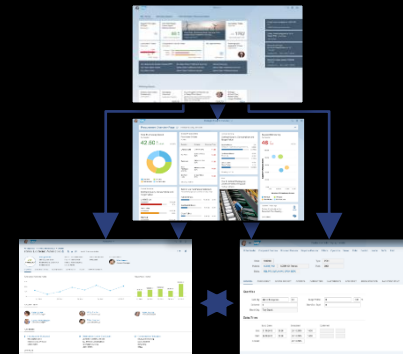

Analysis, Planning, Exception Management

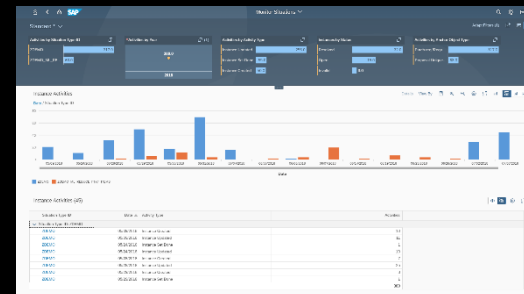

Conversational Digital Assistant
Context aware, Self-learning
pro-active, Mobile

**Insight to action through
embedded analytics**

**Situations handling for
business exceptions**

Examples,
experience yourself

SAP S/4HANA Sales Order Fulfillment

Intelligent ERP - SAP S/4HANA Predict
Arrival of Stock in Transit

Intelligent ERP – SAP S/4HANA Invoice
and Goods Receipt Reconciliation

90+% Automation in every Process

Example: Invoice-to-Cash

BOT look for incoming remittance advices and load them into the SAP S/4HANA

iRPA

1

Payment details are automatically extracted from pdf and payment advices in SAP S/4HANA created

2

Machine Learning

Automatically match payments with open receivables and clear payments

3

Machine Learning

SAP S/4HANA
Persona – Accounts
Receivable Manager Demo

4

System ALERTS Ted that one of the invoices due was excluded from the payment

Ted uses CoPilot to find the collection of worklist items

CoPilot

BOT will monitor the mailbox for any customer reply and attach the customer reply to the dispute case

6

iRPA

After contacting the customer and a dispute case created, BOT automatically send out email confirmation with the dispute case #

5

iRPA

SAP S/4HANA: Where We Are Now

Highlights

- \$1.5B Increase in commerce revenue** - Hewlett Packard Enterprise High Tech
- \$5 MILLION REDUCTION IN WORKING CAPITAL EXPENSES** - Macmahon Holdings Limited Mining
- 5%-8% Reduction in equipment maintenance cost** - Ansaldo Energia Industrial Machinery & Components
- 22%-30% Faster time to market for new high-quality, innovative products** - Japan Tobacco International Consumer Products
- \$120 MILLION In merger synergies through reduced costs across IT & ERP systems** - NexTier OilField Solutions Inc. Oil and Gas
- 2 MINS TO RUN DRAINING REPORTS, COMPARED TO 5 DAYS PRIOR** - Ayatlat and LEGRO
- DOUBLED PRODUCTIVITY OF SERVICE CALL CENTERS** - Engie Energia Chile S.A. Utilities

[Complete Story List](#)

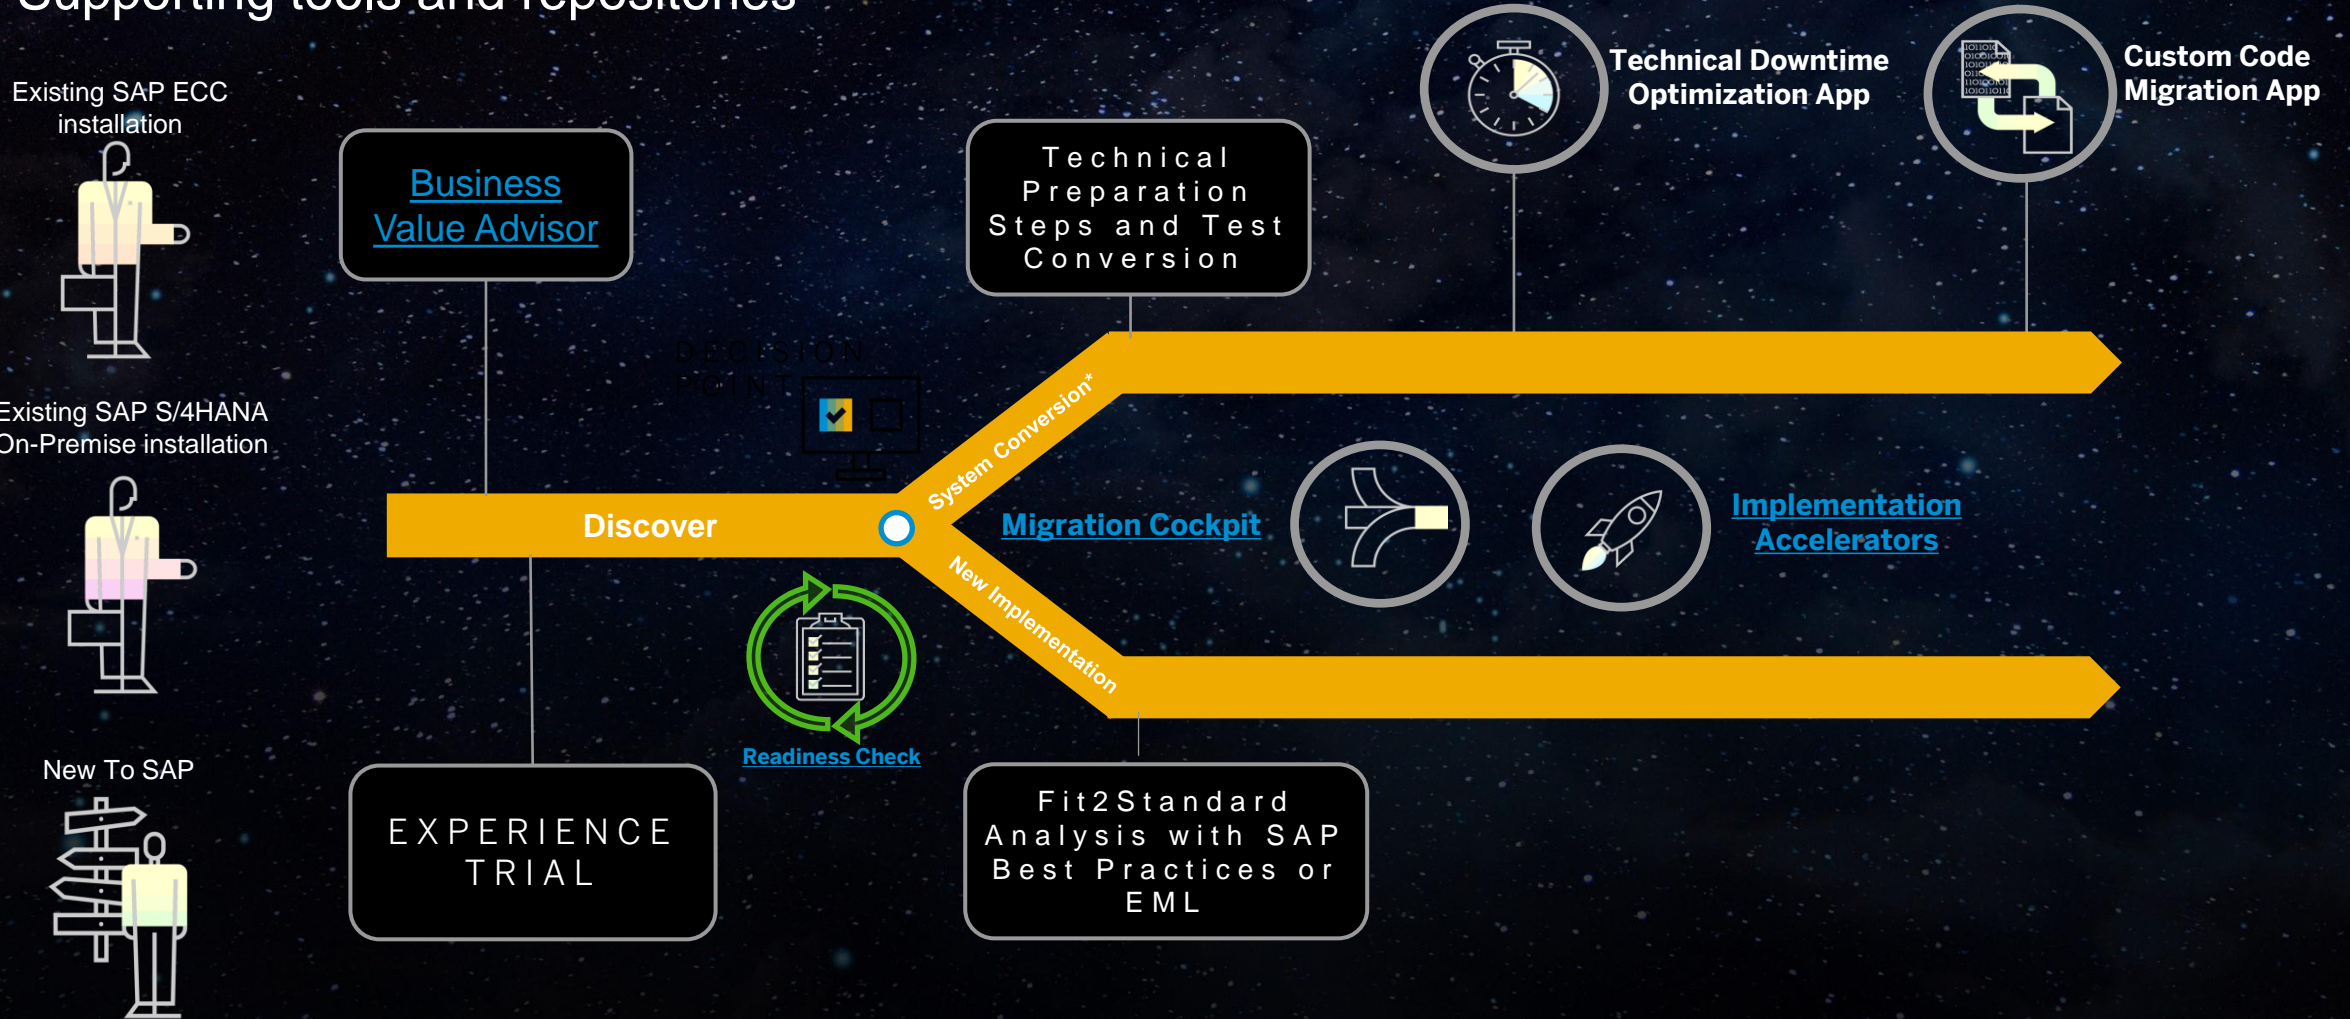

Please find SAP S/4HANA Value Stories [here](#).

We are making key functional investments into market differentiators

<p>Chief Financial Officer</p> <h2>Self-Auditing Finance</h2> <p>Risk reduction & cost avoidance by “compliance by default”. Continuous automated monitoring of all financial transactions and outlier detection replacing manual and sample-based testing</p> 	<p>All buying centers</p> <h2>Intelligent Processes</h2> <p>Increased automation & intelligence for maximum efficiency in business processes & employee productivity</p> 	<p>Chief Financial Officer</p> <h2>Universal Parallel Accounting</h2> <p>Achieve one single source for steering your business and operate at a higher degree of automation and accuracy in Controlling and Closing</p> 	<p>Head of Supply Chain</p> <h2>Predictive MRP</h2> <p>Simulate changing demand situations to navigate your business: optimize inventory & grow sales</p> 	<p>Head of Supply Chain</p> <h2>Synchronized Planning</h2> <p>End-to-end visibility in your supply chain, ensuring that problems can be identified and responded to efficiently and thus create a resilient supply chain</p> 
<p>Chief Sustainability Officer</p> <h2>Footprint Management</h2> <p>Assess the carbon and natural capital footprint at each business level to improve decision making with holistic transparency on sustainability parameters & to enable action for decarbonization</p> 	<p>Head of Procurement</p> <h2>ONE Procurement</h2> <p>Cover all spend channels with one platform to increase efficiency in teams. Free up capacity in procurement teams & shared-service centers by automation & intelligence</p> 	<p>Head of Service</p> <h2>ONE Scheduling and Dispatching</h2> <p>Increase service revenue by improving service experience for customers.</p> <p>Reduce operations cost by assigning the right person to the right job</p> 	<p>Head of Sales Operations</p> <h2>Subscription Business</h2> <p>Create customers for life with pay-per-use/ outcome offerings.</p> <p>Reduce revenue leakage and increase cash flow to improve KPIs like Days Sales Outstanding</p> 	<p>All buying centers</p> <h2>Industry Cloud</h2> <p>Cloud native applications to support Retail, IM&C, Automotive and more industries with vertical industry specific capabilities</p> 

The journey is equally important as function & feature

SAP Readiness Check for SAP S/4HANA

Preparation phase

Realization phase

Relevant **simplification items** based on analysis of the existing SAP ERP system; with **effort ranking**

Currently installed **add-ons** checked for compatibility with SAP S/4HANA

Estimated memory and disk **sizing**, before and after cleanup, including archiving potential

Recommended **SAP Fiori apps** based on usage statistics in the existing SAP ERP system

Additional checks support:

- Financial data quality
- Customer/vendor integration
- Business process automation
- SAP Innovative Business Solutions

Action items resulting from the relevant simplification items

Compatibility analysis of **active business functions** with SAP S/4HANA

Analysis of **custom code** with respect to SAP S/4HANA compatibility

Insight into the compatibility of existing **BW extractors** and **IDocs**

- A holistic system analysis is the foundation for further planning steps toward a successful and smooth transition to SAP S/4HANA.
- SAP Readiness Check for SAP S/4HANA summarizes the most important aspects of the conversion and upgrade in an easily consumable way.

Leveraging the opportunities is key

Various Capabilities to rethink processes

Understand the system usage

BTI with Signavio
User Research
Classical ABAP Tools

Performance

HANA
New Data Models
No locking in Logistics

Automation

iRPA
Machine Learning
Prediction
IoT

Consume Innovation

6+ years of S/4HANA development
When did you last consume innovation in ERP?
Back to standard

User Productivity

UX Technology
(Fiori, Mobile, Speech,...)
Embedded analytics
Insight to action
User-driven admin processes
(purchasing, travel and time management, ...)

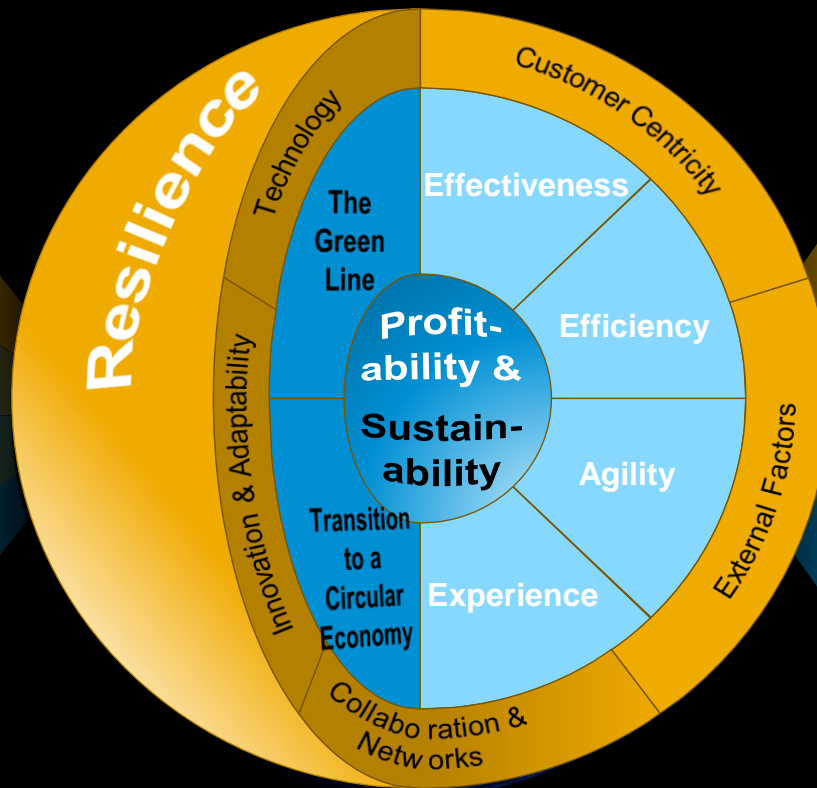

Specialties

Business Technology Platform
Responsibility determination for matrix organization
Situations for exception handling

The digitally transformed economy offers various opportunities

Intelligent processing is not just another trend, it is part of the solution
