

## HOW TO ACCESS YOUR ENCRYPTED DVD

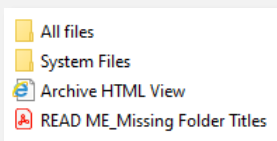

Your archive DVD is double encrypted. You will need software that can open zip files to access the content. Please [call](#) us should you need any assistance.

### ACCESS THE DVD

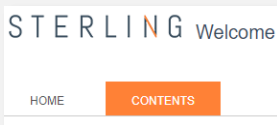

- 1 Insert the DVD into your DVD drive.
- 2 Open the archive file ending (- encrypted) on the DVD, using your preferred zip file extraction software, e.g., WinZip or 7-zip.
- 3 Enter the password the first time and unzip the content to a local drive.
- 4 Now do the same again, enter the same password and unzip the content to a local drive.
- 5 Your data room archive is now available, and you can access the content.

### ACCESS THE CONTENT

- 1 Within the DVD, double click on 'Archive HTML View' to open the HTML index structure with your preferred browser (we recommend using Chrome or Edge):

- 2 Click on Contents tab:

- 3 You might have to click on 'Allow blocked content' if a browser security message pops up.
- 4 Your data room HTML index structure is now available:
