

BETTER ACCESS, BETTER CARE

Synergy Cloud

Creating Continuity of Care

Circadian[®]ce

ABOUT SYNERGY CLOUD

Synergy Cloud software allows clinicians to easily identify and classify apneas, bradycardias, or desaturations minimizing the effort required to accurately record potential life-threatening events. It provides graphical displays, the ability to define patient information, customizable event labels, and a notes section for improved communication. Patient demographics, monitoring parameters, and history are provided in customizable, one-page reports categorized as patient event equipment summaries or compliance reporting.

Easy-to-Use

- Data available through website anytime, anywhere through PC, tablet or mobile
- Familiar interface with intuitive functionality and design
- Can import data from existing SmartMonitor cardiorespiratory monitors

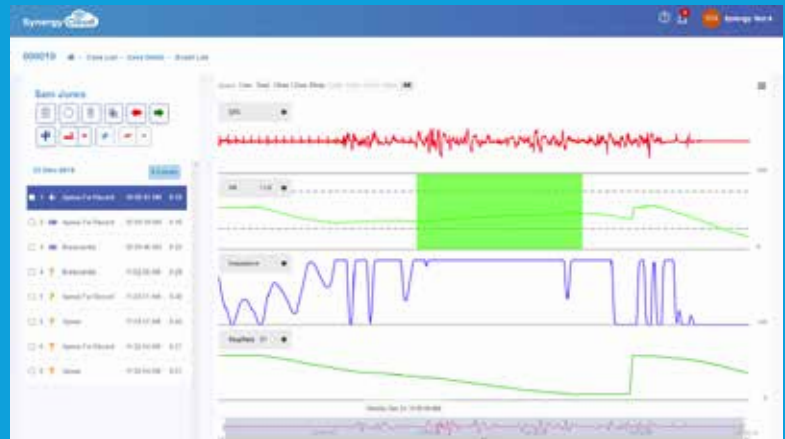

ABOUT SYNERGY CLOUD

Streamlined Communication

- Continuity of care between hospital and home for NICU graduates
- Communication to care team is simplified, automated and configurable by case
- Ability to interface with hospital EMR

Robust Analytics

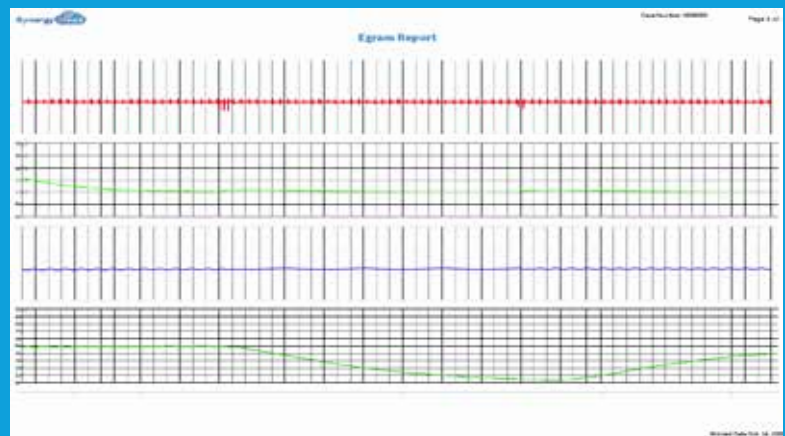

- All downloads consolidated in one patient case record improving data interpretation
- Detailed reporting

Patient Event Report
