The SleepWeaver® Élan nasal PAP mask features exhalation holes under the mask to match up with your natural nasal exhalation. The mask is angled so the exhalation doesn't bother you or your bed partner. **This unique mask, along with any replacement cushions, is reimbursed under HCPCS Code A7034.**

WHY MAKE ÉLAN YOUR MASK OF FIRST RESORT?

1.

The cushion is a simple replacement item that allows the patient to personalize their Élan mask with five available styles to choose from. This cloth portion of the mask interface can be replaced every three months!

2.

The breathable, non-allergenic mask is comfortable—inflating like a balloon to create an airtight seal—eliminating leaks, pressure points, sore spots, and pinching.

3.

Success of PAP therapy is dependent on the patient's ability to tolerate their mask interface. The Élan's soft-cloth interface ensures comfort, fit, and compliance for most faces.

"As a DME provider and patient advocate, my goal is to educate vendors, Sleep Labs, and patients alike to the comfort and benefits of SleepWeaver soft-cloth masks." —Patti B., RRT
