R/T PLUS PACK

5.7L HEMI® VVT V8 W/ MDS - RWD
375 HP / 556 NM TORQUE

Providing up to 375 horsepower and 556 Nm of torque, this power plant moves you from 0 to 100 km/h in the five-second range. When equipped with the standard TorqueFlite eight-speed automatic transmission, the FuelSaver MDS allows the vehicle to transition from eight cylinders to four when full power is not required to optimise fuel efficiency.

SCAT PACK 392

6.4L SRT® HEMI® V8 W/ MDS - RWD
485 HP / 644 NM TORQUE

Assaulting the asphalt with 485 horsepower, 644 Nm of torque, an impressively flat torque curve and a 0 to 100 km/h time in the four-second range. The standard TorqueFlite eight-speed automatic transmission and the FuelSaver Multi-Displacement System (MDS) technology deactivates four cylinders, when eight are not needed, creating a double threat of power and efficiency.

SRT HELLCAT

6.2L SRT® HEMI V8 W/ MDS - RWD
717 HP / 890 NM TORQUE

With an earth-shattering 707hp supercharged 6.2L V8 engine and 890 Nm of torque the Dodge Charger Hellcat pushes the limit of speed for road vehicles. With a rugged 8- speed automatic transmission built to withstand the immense power from the engine, driving the Hellcat is something to experience.

***THE MOST AUSTRALIAN
MANUFACTURED CAR.***

8.4-INCH **TOUCHSCREEN**

FULL CONTROL

from the touchscreen radio, including the available Largest-in-Class 8.4-inch touchscreen. Remain focused on the road with your hands on the wheel, while you communicate, navigate and stay entertained.

APPLE CARPLAY

The smarter, safer way to use your iPhone inside your vehicle. Plug in to seamlessly integrate Uconnect. You can use the touchscreen or Siri to make calls, access Apple Music, send and receive messages, get directions optimised for traffic conditions and more while staying focused on the road.

ANDROID AUTO

This plug-and-play capability provides a safer way to use Android while in your vehicle, easily access the best of Google Maps with voice-guided navigation and Play Music, place phone calls or send and receive messages and ask Google any questions by voice command.

Park-sense rear park Assist

When the vehicle is in Reserve and moving at low speeds, the system can sense nearby objects. When sensors detect objects in the back-up pathway, the system provides an audible and visual warning.

Forward Collision Warning (FCW)

FCW uses radar sensors to monitor the roadway in front of the vehicle, discerning distance, horizontal direction and angle, and relative speed between the vehicle and any object or vehicle ahead. The system can warn the driver of a potential collision risk via an audible chime and visual alert in the in-cluster display.

Adaptive Cruise Control

Utilising radar and video sensors, this system helps maintain a safe, driver-selectable distance from the vehicle ahead.

Parkview Rear Back-Up Camera with Dynamic Grid Lines

This system displays an accurate visual reference of what is behind your vehicle when it's in Reverse.

Rain-sensing Windshield Wipers

System sensors automatically detect moisture on the windshield and activate the wipers.

Electronic Stability Control (ESC)

This system is designed to assist drivers in maintaining control of their vehicles during extreme steering manoeuvres. ESC senses when a vehicle is starting to spin (oversteer) or plow (understeer) and attempts to correct the vehicle's course by automatically controlling the throttle and applying the brakes at individual wheels.

Blind-spot monitoring (BSM) with rear cross-path detection

Dual radar sensors constantly monitor driver blind spots, providing notification of an encroaching vehicle via illumination icons on the sideview mirrors and by an audible chime if the turn signal is activated. The system includes Rear Cross-Path Detection which monitors for vehicles and objects travelling perpendicular to the vehicle while backing out of tight parking spots.
