# UNBREAKABLE PERFORMANCE

## 5.7L HEMI V8 MDS

Mated to the 5.7L HEMI V8—with or without eTorque—is the 8-speed automatic, handling the standard torque of 556Nm as well as the 176Nm of available supplemental eTorque. The 8-speed characteristics point to resilient strength. Examples: fully electronic performance. On-the-fly shift map changing. With great performance, drivability and fuel efficiency. Finally, wide ratio spreads help improve fuel efficiency by reducing rpm.

5.7L HEMI® VVT V8 W/ MDS - 4x4  
(Etorque Available)

395 HP / 651 NM Torque

14.7 L/100 KM City / 9.4 L/100 KM Hwy

4.5T Towing Capacity

8-speed Automatic

# **THIS IS *COMMAND CENTRE***

This is powerful, user-friendly technology that delivers a premium and all-new level of entertainment, communications, comfort and convenience. The latest generation of the award-winning Uconnect system brings phone technology to new heights with the Largest-in-Class reconfigurable 12-inch touchscreen features a one-touch customizable "Home Screen" with split-screen capability.

**RADIO**

**PHONE**

**CONTROL**

**APPS**

**VOICE**

**APPLE CARPLAY** The smarter, safer way to use your iPhone inside your vehicle. Plug in to seamlessly integrate Uconnect. You can use the touchscreen or Siri to make calls, access Apple Music, send and receive messages, get directions optimised for traffic conditions and more while staying focused on the road.

**ANDROID AUTO** This plug-and-play capability provides a safer way to use Android while in your vehicle, easily access the best of Google Maps with voice-guided navigation and Play Music, place phone calls or send and receive messages and ask Google any questions by voice command.

## **SAFETY WHERE IT MATTERS MOST: EVERYWHERE**

OVER 100 STANDARD & available **safety & security features**

### **LANE DEPARTURE WARNING WITH LANE ASSIST**

Ram 2500/3500 can read the road. Mounted on the external mirrors, available cameras can identify road lines, determine where the vehicle is and monitor motion. Should movement onto either line be detected without use of the indicator, the system will warn the driver and apply torque to the steering wheel to correct the movement. If no action corrects the drift, Lane Keep Assist<sup>4</sup> can help gently nudge the vehicle back into the lane by applying corrective steering input.

### **ADAPTIVE CRUISE CONTROL WITH STOP AND GO**

Think cruise control that's smarter than ever. When the lanes ahead are clear, this available system maintains the set speed of travel. When traffic slows, it will automatically adjust to a safe distance selected by the driver. In certain conditions, such as stop-and-go traffic, the system is able to bring the vehicle to a complete stop without any driver intervention, then prompt the driver to press the Resume button or tap the accelerator to re-engage to safe-range speeds as traffic begins to move.

### **FORWARD COLLISION WARNING WITH ACTIVE BRAKING**

Using radar and video sensors, this available system detects whether the vehicle is approaching a vehicle or large obstacle in its path too rapidly. When an object is detected, the system can provide audible and visual warnings and can assist the driver in avoiding the incident by actively applying the brakes. The driver can adjust the sensitivity and turn brake support on or off using the Uconnect<sup>®</sup> radio.

### **BLIND-SPOT MONITORING WITH TRAILER DETECTION**

This available system utilizes sensors in the exterior mirrors to monitor the "blind spots" on each side of the vehicle. The system provides audible chimes and visual icons, informing the driver when changing lanes, passing others or being passed. The Trailer Detection feature allows the driver to select Max, Trailer Length or Auto mode, automatically detecting the trailer length and adding it into the blind-spot.

### **REAR CROSS-PATH DETECTION**

When in Reverse, the Rear Cross-Path Detection System detects vehicles and/or other objects that are in perpendicular relationships to your Ram truck using dual wide-band radar sensors, and notifies you using illuminated icons in the outside mirrors and driver-selected chimes.

### **NEW 360 SURROUND-VIEW CAMERA**

Select models let you bring available 360-degree awareness to your drive. Credit the smart combination of strategically positioned sensors that work with cameras mounted in the grille, exterior mirrors and rear. In particular, the bird's-eye view offers exceptional monitoring of your ride.   
\*Not available with trailer tow Group.

### **PARK ASSIST**

Sophisticated sensors give the All-New Ram 2500/3500 superb capability. Available and new for 2019: the invaluable Parallel and Perpendicular Park Assist systems, making parking manoeuvres on the street and in parking lots easier than ever. Just engage the system, and enjoy hands-off parking.

### **LARGEST STANDARD BRAKES IN THE SEGMENT**

Confident stopping power comes from a new brake system that's large, robust and ultra-capable. The largest rotors in the segment measure 378 mm (14.9 in) in diameter, sharply reducing the 100 – 0 km/h stopping distances and helping to improve overall performance.

### **LED SMARTBEAM HEADLAMPS**

This available advanced system provides the maximum amount of light possible, automatically switching headlamps from high- to low-beam when oncoming headlamps or forward light are sensed, or when taillamps are detected in front of the vehicle.

# **PLUS HEAPS MORE**

3-YEAR / 100,000KM  
**WARRANTY**

3 - YEAR

# WARRANTY

## 3-year/100,000km warranty.

Legendary power, work-ready capability and innovative features are part of every Ram. But it doesn't stop there. We work just as hard to make sure your ownership experience is as rewarding and reliable as your new truck.

As part of that commitment, our vehicles are backed by a **3-year/100,000km** warranty. You can rest assured that we're here to help with any warranty issues. With a proven track record of happy customers, you can count on us to be there when you need us most.
