# AVEVA™ Edge Management

Make managing and provisioning devices and software at the edge easy with AVEVA™ Connect

AVEVA Edge Management delivers users a powerful framework that simplifies the remote management of edge devices and applications. This new offering from AVEVA enables edge applications to be successfully incorporated into a variety of hybrid architectures including industrial internet of things (IIoT). The result is an edge application lifecycle that enables operational excellence and asset performance.

### Reduce Costs

Instead of individually maintaining disparate devices across multiple networks, AVEVA Edge Management makes it easy to securely manage and maintain edge devices from one central location. Save time and money to reduce your total cost of ownership.

### Simplify Device Management

AVEVA Edge Management ensures that all your industrial devices can be maintained from anywhere, anytime. Rather than relying solely on local expertise, status and health of devices and deployed applications can be monitored remotely. Applications can be standardized across different locations. This makes it easier than ever to maintain currency of devices.

### Benefits of Edge Management

Native disaster recovery for Edge stations	Central License management	Up-to-date Systems	Configure from anywhere
Reduces MTTR	Reduces operational cost	Enables continuous improvement	Utilize expertise located anywhere
Supports existing products in the portfolio	Simple Subscription Model	Built-in revision control	Remotely deploy and maintain the application lifecycle
Leverages past engineering efforts	Enables new source of revenue to OEMs and value to End Users	Optimizes maintenance of applications	Reduce total cost of ownership

# Commercial and Technical Flexibility

## Flexible Subscription Model

Providing a convenient subscription model, AVEVA™ Flex gives you access to our comprehensive software portfolio, as and how you need it, helping simplify and streamline your digital transformation. Using AVEVA Flex credits, users can subscribe to and deploy software to their devices quickly and easily through the cloud.

## Leverage the Power of AVEVA Connect

Edge Management Services leverages AVEVA Connect to give users the capability to incorporate edge data into a variety of architectures including IIoT. This provides businesses a holistic view of asset and equipment performance and lifecycles. This open, agnostic service means users can also manage complete edge device lifecycles over a remote cloud connection:

- Register Devices
- Configure Modules
- Deploy
- Monitor
- Support

## Dedicated modules include:

### AVEVA™ Edge SCADA

AVEVA Edge SCADA is a highly scalable, flexible software that provides the tools for everything from advanced HMI/SCADA applications to small-footprint embedded applications. The rich feature set enables users to create intuitive, secure, and highly maintainable HMI/SCADA applications for any industry. AVEVA InTouch Edge HMI offers everything required to connect to almost any PLC or controller, create remote HMI applications (for web, Smartphone, or tablet), and develop for a variety of operating systems.

Through AVEVA Edge Management, AVEVA Edge SCADA allows you to remotely monitor and control edge devices and standardize applications across geographically distributed networks.

## AVEVA™ Edge IoT View

AVEVA Edge IoT View is a small-footprint runtime for AVEVA Edge that runs on edge devices using Linux or VxWorks operating systems. AVEVA Edge IoT View also allows you to remotely monitor and control edge devices and standardize applications across geographically distributed networks, making it ideal for architectures featuring multiple edge devices.

## AVEVA Connect. Your digital transformation hub.

AVEVA Edge Management Services is a core component of AVEVA Connect: a cloud platform that spans your entire business – from unified engineering, design and procurement; to optimized operations and production; asset performance management; and improved on-boarding and upskilling of your people.

Take advantage of a perfectly scalable cloud environment, that delivers you a flexible, powerful set of tools that turn opportunities into benefits.
