# MEDIA RELEASE May 21, 2021

# Ryman reports audited full year underlying profit of \$224.4 million

# Key points:

- Audited underlying profit \$224.4 million, 7.3% down due to COVID-19 challenges
- Audited reported (IFRS) profit increased 59.8% to \$423.1 million, due to investment property revaluations
- Final dividend of 13.6 cents, taking the full year dividend to 22.4 cents per share, 50% of underlying profit.
- Ryman has returned more than \$1.03 billion to shareholders since it listed in 1999, when it raised \$25 million
- Record final quarter new sales and resales as market recovers
- Total assets of \$9.17 billion, up 19.5%
- Continued strong demand for aged care in New Zealand and Victoria, mature care occupancy at 97%
- Only 1.4% of resale units unsold at the end of March
- Five villages opened in Victoria by December 2020
- Three new sites purchased, one in Melbourne and two in New Zealand
- No cases of COVID-19 to date among 12,500 residents and 6,100 staff across New Zealand and Victoria

Ryman Healthcare has reported a full year underlying profit of \$224.4 million, with a second half recovery driven by record sales.

Audited reported (IFRS) profit, which includes unrealised fair value gains on investment property, increased 60% to \$423.1 million in the year to March 31, 2021.

Shareholders will receive a final dividend of 13.6 cents per share, taking the total dividend for the year to 22.4 cents per share, which is 50% of underlying profit. The record date for entitlements is June 4, and the dividend will be paid on June 18, 2021.

Chief Executive Gordon MacLeod said transactions and building activity had recovered after a challenging first half due to COVID-19.

"We bore the brunt of the COVID-19 lockdowns in the first half. In the final quarter we achieved record new sales and resales, which was no mean feat after a tough year."

"I couldn't be more proud of how the team has performed – not only to keep COVID-19 out of all of our villages and keep everyone safe – but also to power through and keep on innovating, developing and growing," Mr MacLeod said.

In December Ryman achieved its long-term target of having five villages open in Victoria by the end of 2020, and Ryman has another six villages in the pipeline in Australia.

Ryman has bought new village sites at Essendon in Melbourne, and at Karaka and Cambridge in New Zealand. Ryman has sold its Coburg site in Melbourne after opting to buy a more attractive site in nearby Essendon.

Approval was received to build new villages at Ringwood East in Melbourne, Northwood in Christchurch and two Auckland villages at Takapuna and Kohimarama.

Ryman's total assets grew by 19.5% during the year. The company has diversified \$825 million of debt funding.

A NZ\$150 million retail bond issue in New Zealand, a US\$300 million USPP private debt placement and an A\$250 million institutional term loan were all oversubscribed, Mr MacLeod said.

"The debt issuances allowed us to take our plans to a wider audience of funders and we were delighted with the response. We ended the year with a stronger balance sheet, and new diversified long-term debt funding with weighted average tenor of nine years with plenty of headroom.

"We have had record cash collections of \$1.18 billion during the year to support our largest ever building programme, and we are planning to have 14 villages under construction, seven in Australia and seven in New Zealand later this year.

Ryman's integrated villages and high-quality care continued to be in strong demand, with care occupancy in established villages running at 97%.

Only 1.4% of Ryman's portfolio was available for resale at March 31, down from 1.9% at September 30, 2020. Ryman built 736 new beds and units during the year.

Chairman Dr David Kerr said a highlight was the response to the COVID-19 vaccine rollout, with both residents and staff jumping at the chance to get vaccinated.

"Getting vaccinated is the best thing anyone can do to keep themselves and their loved ones safe," Dr Kerr said.

"We're achieving care resident vaccine rates above 95%, which is really pleasing."

"Our villages are safe havens for older people where they can expect to live well and with the best of care on hand if they need it. The COVID pandemic has made this security about the future top of mind for older people, and we expect demand will continue to grow."

Ryman's development pipeline of 25 new villages would provide homes for more than 6,800 residents and would generate anticipated capital proceeds of \$5.3 billion with recurring income of \$420 million, subject to market conditions and consenting outcomes.

"With the vaccine rollout in full swing and huge potential in our pipeline of new villages, we've put ourselves in a tremendous position for the years ahead," Dr Kerr said.

Ryman will have returned more than \$1.03 billion to shareholders since listing in 1999 after its next dividend is paid on June 18. In 1999 Ryman raised \$25 million from investors.

# Twelve new villages currently under construction:

New Zealand	Australia
Lynfield, Auckland (Murray Halberg)	Brandon Park, Melbourne (Nellie Melba)
Devonport, Auckland (William Sanders)	Burwood East, Melbourne (John Flynn)

<sup>1</sup> Underlying profit is a non-GAAP\* measure and differs from NZ IFRS profit for the year. Underlying profit does not have a standardised meaning prescribed by GAAP and so may not be comparable to similar financial information presented by other entities.

The Group uses underlying profit, with other measures, to measure performance. Underlying profit is a measure that the Group uses consistently across reporting periods.

Underlying profit includes realised movement on investment property for units in which a right-to-occupy has been sold during the period and for which a legally binding contract is in place at the reporting date. The occupancy advance for these units may have been received or be included within the trade receivables balance at reporting date.

Underlying profit excludes deferred taxation, taxation expense, unrealised movement on investment properties, and impairment losses on non-trading assets because these items do not reflect the trading performance of the Company. Underlying profit determines the dividend payout to shareholders.

 $^{2}$  The land bank is subject to resource and building consent and various regulatory approvals.

The accompanying notes form part of these financial statements.

For the year ended 31 March 2021

# I. Summary of Accounting Policies

Ryman Healthcare Limited is a profit-oriented entity incorporated in New Zealand and develops, owns, and operates integrated retirement villages, resthomes, and hospitals for the elderly within New Zealand and Australia.

Ryman Healthcare Limited is a Financial Markets Conduct Act reporting entity under the Financial Reporting Act 2013 and the Financial Markets Conduct Act 2013. Its financial statements comply with these Acts.

The company and its wholly-owned subsidiaries comprise the Ryman Group (the Group).

#### Basis of preparation

These financial statements for the year ended 31 March 2021 have been extracted from the audited annual Group financial statements for the year ended 31 March 2021 and have been prepared to satisfy the Group's NZX reporting obligations.

The audited financial statements have been prepared under the same accounting policies and basis as those used in the prior year's interim and annual financial statements.

The financial statements were approved by the Board of Directors on 20 May 2021.

The information is presented in thousands of New Zealand dollars.

#### Adopting new and amended standards and interpretations

In the current year, the Group adopted all mandatory new and amended standards and interpretations.

We are not aware of any NZ IFRS Standards or Interpretations that have recently been issued or amended that have not yet been adopted by the Group that would materially impact the Group for the annual report period ending 31 March 2021.

#### COVID-19

The outbreak of COVID-19, declared by the World Health Organization as a global pandemic on 11 March 2020, resulted in an increase in uncertainty in both global and local markets.

Both New Zealand and Australia have responded well to the virus with strong public health measures and a range of economic stimulus packages. However, despite the response, there remains uncertainty as to the ongoing impact of the virus on market conditions in New Zealand and Australia. In Australia, Victoria has been through two waves of infection and corresponding lockdowns, succeeding in reducing the spread of infection, and New Zealand has responded with localised increases in alert level to supress transmission of the virus.

Throughout the pandemic the Group's primary focus has been to protect the safety of both residents and staff. When necessary access restrictions have been put in place at villages, additional personal protective equipment has been procured for staff, and other costs incurred in supporting residents and staff.

Under lockdown conditions the ability of new residents to enter villages is limited, meaning fewer sales can be settled, and the restrictions at development sites results in construction activity being reduced. The Group continues to adapt its policies and procedures to operate in the conditions created by COVID-19.

The Group has assessed the impact of COVID-19 and has concluded that additional uncertainty regarding the valuation of property, plant and equipment (note 3) and valuation of investment properties (note 4) has resulted from the pandemic. Further disclosure as to the impact of COVID-19 is included in the relevant notes.

# 2. Reconciliation of net profit after tax with net cash flow from operating activities

	2021	2020
	\$000	\$000
Net profit after tax	423,061	264,710
Adjusted for:		
Movements in balance sheet items		
Occupancy advances	518,292	482,962
Accrued management fees	(59,116)	(64,051)
Refundable accommodation deposits	32,470	40,558
Revenue in advance	7,515	6,456
Trade and other payables	4,845	5,507
Trade and other receivables	(92,565)	(81,124)
Inventory	(26,738)	-
Employee entitlements	6,356	I,844
Non-cash items:		
Depreciation and amortisation	29,892	26,829
Depreciation of right-of-use assets	2,476	1,787
Loss on disposal	15,102	-
Deferred tax	(12,561)	(93,563)
Unrealised foreign-exchange (gain)/loss	(19,063)	2,314
Adjusted for:		
Fair-value movement of investment properties	(416,847)	(144,438)
Net operating cash flows	413,119	449,791

Net operating cash flows includes net occupancy advance receipts from retirement-village residents of \$787.7 million (2020: \$755.3 million).

Also included in operating cash flows are net receipts from refundable accommodation deposits of \$27.9 million (2020: \$41.1 million).

Net operating cash flows also include management fees collected of \$48.0 million (2020: \$44.6 million).

# 3. Property, plant and equipment

All completed resthomes and hospitals included within the definition of freehold land and buildings were revalued to fair value based on an independent valuation report prepared by registered valuers, CBRE Limited, at 31 March 2021, in line with NZ IFRS 13 – *Fair Value Measurement*. These revaluations are undertaken every 2 years, unless there is sustained market evidence of a significant change in fair value.

The valuers used multiple valuation techniques to estimate and determine fair value. The valuer made key assumptions that include capitalisation of earnings (using capitalisation rates ranging from 11.0 percent to 15.0 percent), together with observed transactional evidence of the market value per care bed (ranging from \$70,000 to \$230,000 per care bed).

As the valuer uses several valuation techniques a significant decrease in the capitalisation rate could but may not necessarily result in a significantly higher fair-value measurement. Conversely, a significant increase in the capitalisation rate could but may not necessarily result in a significantly lower fair-value measurement.

A significant increase in the market value per care bed could but may not necessarily result in a significantly higher fair-value measurement. Conversely, a significant decrease in the market value per care bed could but may not necessarily result in a significantly lower fair-value measurement.

#### Uncertainty due to COVID-19

The valuation of completed resthomes and hospitals performed by CBRE Limited at 31 March 2021 is based on the information available to them at the time of the valuation and relies on several inputs.

Given the current situation with COVID-19 there is an increase in the estimation uncertainty in determining the fair value of completed resthomes and hospitals at 31 March 2021 compared to previous valuations.

CBRE comment that the ultimate economic impact COVID-19 will have on the aged care sector is unknown and will depend on both the scale and longevity of the pandemic, future outbreaks, and the lock down responses of the Governments in New Zealand, Victoria and Australia.

Given the heightened uncertainty and unknown impact that COVID-19 may have in the future, a higher degree of caution should be exercised when relying upon the valuation. Values and incomes may change more rapidly and significantly than during standard market conditions.

Occupancy in the Group's mature aged-care facilities has not been impacted by COVID-19.

#### Disposal of land

During the year, the Group sold the land in Coburg, Melbourne. The sale led to a loss on disposal of \$15.1 million which has been recognised in the income statement.

# 4. Investment properties

	<b>202  </b> \$000	<b>2020</b> \$000
At fair value	· · · · · · · · ·	
Balance at beginning of financial year	5,760,060	5,081,607
Additions	624,926	541,272
Fair-value movement:		
Realised fair-value movement:		
new retirement-village units	108,377	105,757
existing retirement-village units	107,317	109,565
	215,694	215,322
Unrealised fair-value movement	201,153	(70,884)
	416,847	144,438
Net foreign-currency exchange differences	35,445	(7,257)
Net movement for the year	1,077,218	678,453
Balance at end of financial year	6,837,278	5,760,060

The realised fair-value movement arises from the sale and resale of rights to occupy to residents. Investment properties are not depreciated and are fair valued. As the fair value of investment property is determined using inputs that are unobservable, the Group has categorised investment property as Level 3 under the fair-value hierarchy in line with NZ IFRS 13 – *Fair Value Measurement*.

The carrying value of completed investment property is the fair value as determined by an independent valuation report prepared by registered valuers CBRE Limited, at 31 March 2021. This report combines discounted future cash flows and occupancy advances received from residents for retirement-village units that are complete or nearing completion, for which there is an unconditional agreement to occupy.

#### Uncertainty due to COVID-19

The valuation of investment properties performed by CBRE Limited at 31 March 2021 is based on the information available to them at the time of the valuation and relies on several inputs, as outlined below.

Given the current situation with COVID-19 there is an increase in the estimation uncertainty in determining the fair value of investment property at 31 March 2021 compared to previous years.

The material valuation uncertainty within the New Zealand and Australian valuations at 31 March 2020 has been removed. This has been replaced with CBRE commenting on higher than normal market uncertainty within their valuations.

Given the heightened uncertainty and unknown impact that COVID-19 may have in the future, a higher degree of caution should be exercised when relying upon the valuation. Values and incomes may change more rapidly and significantly than during standard market conditions.

Comparable transactions and market evidence has been limited during the pandemic and CBRE have placed less reliance on previous market evidence for comparison purposes.

# 4. Investment properties (continued)

To reflect this uncertainty CBRE Limited adjusted their assumptions on recycle frequencies for independent units at mature villages, near-term house price inflation for independent units, and discount rates in their valuation at 31 March 2020. As the level of uncertainty has decreased and markets have become more accustom to operating under COVID-19 conditions, CBRE have reversed some of the adjustments in determining the valuation at 31 March 2021.

#### **Key assumptions**

The valuer used significant assumptions that include house-price inflation (ranging from 0.5 percent to 4.20 percent nominal) (2020: -2.0 percent to 3.5 percent) and discount rate (ranging from 12.00 percent to 16.50 percent) (2020: 12.25 percent to 16.25 percent).

#### Sensitivity

A 0.5 percent decrease in the discount rate would result in a \$91.3 million higher fair-value measurement. Conversely, a 0.5 percent increase in the discount rate would result in a \$85.3 million lower fair-value measurement.

A 0.5 percent decrease in the 5-year plus growth rate would result in a \$168.7 million lower fair-value measurement. Conversely, a 0.5 percent increase in the 5-year plus growth rate would result in a \$140.8 million higher fair-value measurement.

Other inputs used in the fair-value measurement of the Group's investment property portfolio include the average age of residents and the occupancy period.

A significant increase in the average age of entry of residents or the long-term nominal house-price inflation rate would result in a significantly higher fair-value measurement. Conversely, a significant decrease in the average age of entry of residents or the long-term nominal house-price inflation rate would result in a significantly lower fair-value measurement.

#### Work in progress

Investment property includes investment property work in progress of \$653.0 million (2020: \$508.2 million), which has been valued at cost. For work in progress cost represents fair value.

# 5. Occupancy advances (non-interest bearing)

	<b>202 I</b> \$000	<b>2020</b> \$000
	4000	4000
Gross occupancy advances (see below)	4,205,105	3,686,813
Less management fees and resident loans	(502,890)	(439,636)
Closing balance	3,702,215	3,247,177
	2021	2020
	\$000	\$000
Movement in gross occupancy advances		
Opening balance	3,686,813	3,203,851
Plus net increases in occupancy advances:		, ,
new retirement-village units	395,094	386,673
<ul> <li>existing retirement-village units.</li> </ul>	107,317	109,566
Net foreign-currency exchange differences	21,807	(4,276)
Decrease in occupancy advance receivables	(5,926)	(9,001)
Closing balance	4,205,105	3,686,813

Gross occupancy advances are non-interest bearing.

The decrease in occupancy advance receivables shows the net movement in occupancy advance that has resulted from:

- units that have been re-sold but the previous resident has yet to be repaid; and
- units that have been repaid but the unit remains unsold at balance date.

# 6. Dividend

On 21 May 2021 a final dividend of 13.6 cents per share was declared and will be paid on 18 June 2021. The record date for entitlements is 4 June 2021.

# 7. Share capital

Issued and paid-up capital consists of 500,000,000 fully paid ordinary shares (2020: 500,000,000). All shares rank equally in all respects.

Basic and diluted earnings and net tangible assets per share have been calculated on the basis of 500,000,000 ordinary shares (2020: 500,000,000 shares).

Shares purchased on market under the leadership share scheme are treated as treasury stock until vesting to the employee.

#### 8. Commitments
