

Exostar Secure Access for Microsoft 365

Overview

Today's business environment requires enterprises to quickly, securely, seamlessly, and continuously collaborate with their partners. Doing so becomes more challenging for those companies working in highly-regulated industries such as the Defense Industrial Base (DIB), Life Sciences, Healthcare and Financial Services.

Working in partnership with Microsoft, Exostar provides a managed service – Exostar Secure Access for Microsoft 365 – for extended enterprise collaboration that facilitates compliance without compromising convenience or security.

Benefits

- **Highly-scalable** onboarding of organizations and users
- Built-in best practices for **collaboration** specifically tailored for highly-regulated industries
- External **user identity management** (including complete life cycle management)
- Comprehensive managed services support for **Tier 1 through 3**

Why Exostar?

The Exostar Platform represents the culmination of **20 years of successfully and exclusively delivering secure B2B collaboration solutions** for a growing community in highly-regulated industries. It supports the **governance, risk, and compliance** requirements for collaboration between **enterprises and their partners**
