

Is Your PartnerMD Doctor In-Network?

PartnerMD accepts most health insurance plans. To the best of our knowledge at this time, the following is a list of health insurance providers with which we participate. We also called out a few notable exceptions. In most cases, we do take Medicare, however, we do not take Medicaid at this time in any of our offices.

Individual products within a plan may vary. To be certain that PartnerMD and your doctor are considered in-network with your health insurance, you must take your specific insurance product into account.

To do this, visit the website for the insurance carrier. Look for the “provider lookup” tool. Enter the exact product name for your insurance and the practice and/or doctor name to confirm in-network status.
