

End-to-End Fulfillment

Caring for Products and Orders from Port-to-Porch

A robust fulfillment process starts long before today's customer creates their order. Red Stag Fulfillment will help you manage the entire process from port or point of entry to the porch of customers eagerly awaiting your best products. Here's how we do it for every big, bulky, heavy, and amazing SKU.

//

Red Stag's state-of-the-art technology platform and in-house tech team really simplified the integration process for us. The daily challenges of managing a warehouse and fulfilling orders is no longer a pain point for us. In fact, it's not even on our radar anymore.

— Steve Mariucci
COO, Isle Surf & Sup

Integrated Ahead of Inventory Orders

You'll integrate with Red Stag Fulfillment's leading dashboard and inventory management system. We get notified of inbound freight shipments and track them from port to our dock doors. Use your preferred carrier and account or work with our freight forwarding partners.

Inventory Received, Processed, and Stored

To sell goods, you've got to have them in stock. We'll take care of that for you and guarantee it along the way. For your inbound order of any size, once unloaded in our facility, we'll receive it accurately within two business days. And that inventory count stays accurate as long as your products are in our care. Open our dashboard and see stock levels for every SKU and get help with forecasts to optimize your next resupply.

Picked and Packed With Care

When customers place an order from your store or a marketplace partner, you get to sit back and cheer. Our integrated tech stack routes orders to the best warehouse to fill each order based on your speed and price preferences. Then, Red Stag's pick and pack pros fill each order with the right products, checking for accuracy multiple times along the way. Your products get out to customers accurately and on-time, guaranteed.

Ship. Delight. Repeat.

This order and every order are shipped according to your service level. Our team minimizes your expenses by optimizing packaging, carrier product selection, and more. You and your customers get tracking details while our carrier partners get it to your customer's porch.

Try us and discover why Port-to-Porch is the secret weapon you wish you already had.

Red Stag has been a part of OATLY's eCommerce journey since we sold our first carton of oatmilk through the Internet, and we have grown together in that journey. Particularly over the past year, through the global pandemic, everyone at OATLY has appreciated their ability to scale with our business and help keep the oatmilk flowing into customers' hands who order from us online.

— Mike Messersmith
President, Oatly North America
