

# J.POD<sup>®</sup> GMP MANUFACTURING

The most advanced and flexible biologics development and GMP manufacturing facility in North America

Just – Evotec Biologics is a unique platform company that integrates the design, engineering, development, and manufacture of biologic medicines to create access and value for a global market through scientific and technological innovation.

A key element of the Just – Evotec Biologics model is to create efficiencies in the complex process of developing and manufacturing protein-based biotherapeutics.

In 2021, Just – Evotec Biologics will complete the construction and qualification of its new manufacturing facility in Redmond WA, called J.POD – Evotec Biologics. J.POD is the most technologically advanced and flexible biologics development and GMP manufacturing facility in North America. Completion of the first J.POD facility represents a significant milestone in the company's mission to expand access to patients globally by lowering the cost of development of biologic-based medicines.

The J.POD facility expands Just – Evotec Biologics' process development and GMP manufacturing capacity, providing new and existing partners with unmatched flexibility to quickly and cost effectively produce drug substance for clinical and commercial use, from small batches of a few kilos to metric tons.

J.POD is named for the application of biologic manufacturing in PODs, which create separate autonomous cleanroom environments that can accommodate an array of molecule and process formats in one facility.

## **Location**

22857 Marketplace Drive  
Redmond, Washington 98053

## **Employees**

300 by 2022

## **Capacity**

Kilos to metric tons of drug substance

## **Facility**

130,000 square feet of manufacturing, quality labs, process development labs, warehouse space, and collaborative office and meeting space

## **Sustainability**

Substantially reduces the use of water, electricity, chemicals and waste stream compared to traditional bioprocessing
