

AVG Ultimate

Your all-in-one antivirus, VPN, and tuneup combo

Our best security

Enjoy our most advanced, real-time security for your PC to protect against everything from viruses and ransomware, to hidden snoops and hackers.

Our best privacy

Protect your online privacy on any Wi-Fi network with 256-bit AES encryption, and ensure that no one – not even your internet provider – can eavesdrop on the websites you visit and the files you download.

Our best performance

Free up disk space on your PC, find and remove hidden duplicate files and poor-quality photos in exchange for better speed and full performance, with automatic tuning updates.

Minimum system requirements

Windows
Microsoft Windows 7, 8, 8.1, or 10
2 GB of disk space
Internet connection for automatic updates

AVG Ultimate gives you the very best of AVG

A single subscription covers your PC with the following apps

AVG Internet Security

Our best-in-class protection is designed with simplicity in mind, without compromising security. Packed with features like real-time AI-based threat detection, Ransomware Protection, Webcam Protection, and Enhanced Firewall, it's everything you need and more to stay protected both online and off - whatever comes your way.

AVG TuneUp

Our all-in-one tuning suite automatically speeds up your PC, cleans up junk data, gives you better battery life, keeps your essentials always up to date, and fixes small issues before they become real problems. Whether you're running a new PC right out of the box, or have been on the same one for years, you'll be amazed at what your PC can do.

AVG Password Protection

Saving passwords in your web browser has always been convenient, but never safe — until now. We secure your Google Chrome and Mozilla Firefox passwords to prevent malware and hackers from stealing them, and identify weak passwords for you to strengthen with our built-in password generator. We'll even alert you if your passwords leak online and help you change them.

AVG Secure VPN

Browse and shop in total privacy. Visit any website you want. Or buy what you want. We hide you behind our servers so no one — not even your internet provider — can see what you do online.

AVG Ultimate gives you the very best of AVG, from advanced, real-time security to premium tuneup to keep your PC running quickly and smoothly at all times.
