

# Advanced Customization

A completely branded payments experience, in just a few clicks.

Fattmerchant's Advanced Customization app allows you to tailor the appearance of invoices, receipts, and website payments to help ensure a consistent brand experience for your customers from start to finish.

## Customize Colors:

Design a secure website payment page that aligns perfectly with your brand. Use the color picker to add your business' custom colors to customer-facing payment pages - bringing your brand front-row and center during the payment experience!

## Add Custom Fields:

Create custom required fields to display on your website payment pages to gather every important detail about a payment prior to sending - like patient ID, case number, or whatever your business needs! Plus - custom field entries are completely searchable, making it simple to find a payment when you're looking for it!

## Your Brand, Your Way:

Prefer to hide Fattmerchant's signature logos? Not a problem - simply use the checkbox to hide Fattmerchant's logo from invoices, receipts, and website payment pages.
