

# Asset Management

Track and manage company assets & equipment: Always know what you have, where it's located, detailed product information, and what work has been done. This module integrates with Preventive Maintenance and other NetFacilities modules. All on a secure centralized work hub.

## The new way to Manage Assets

- Organize all assets in hierarchy, parent child
- Fixed or movable assets/equipment
- Bar Code scanning and verification
- Preventive Maintenance can be tied to equipment
- Fixed schedule maintenance or corrective maintenance
- Specific steps for each maintenance interval
- Meter reading to trigger PMs
- Automatic reminder notifications
- Custom fields for data tracking
- Collect cost for work items
- Calculate PM completion rates
- Tracking vendor or employee performance
- Follow up with interactive discussions
- Full Asset info with attached files
- Entire maintenance history and audit trail
- Deep Analytics and downtime tracking
- Available on our Apple and Android Mobile Apps

**Flexible Setup. Fast Access. Actionable Data.**

Whether you have fixed or moveable assets, or both, the NetFacilities platform makes it easy to organize and track them with access to the information you need to manage your business and do your job. Configurable tools deployed for your business processes.

## Integrates with:

- Preventive Maintenance
- Labor Tracking
- Vendor Access & Control
- Inventory and Materials
- Inspections
- Invoicing
- Work Orders
- Detailed Analytics
- MobileFacilities App

## Results:

- Improved Efficiency
- Reduced risk of failures
- Easier oversight
- Longer equipment life
- Fewer emergencies!
