

AERODERIVATIVE TURBINE SERVICES

RelaDyne Reliability Services (RRS) is proud to provide services for the lubrication and hydraulic systems of Aeroderivative turbines, including pre-commissioning and preventative maintenance services.

Oil systems are essential to this highly specialized equipment. RRS has the experience and understanding of these systems to properly drain, clean, flush, and fill both their synthetic and mineral oil systems, without environmental impact.

TYPICAL APPLICATIONS

- Synthetic and mineral oil lube system turbine oils
 - Thrust bearings and guide bearings
- Storage tank cleaning - New (clean) oil and used (dirty) oil
- Bearing failure flushing/filtration service

PRE-COMMISSIONING AND PREVENTATIVE MAINTENANCE SERVICES

- High velocity oil flushing, >30,000 Reynolds number
- Fluid purification services, ISO 4406: 16 / 14 / 11
- Chemical cleaning, rust, and scale removal
- Varnish mitigation services (patented process)
- Oil system preventive maintenance
- Oil dehydration and reclamation services

THE RRS DIFFERENCE

- Dedicated, purpose-built flushing and filtration equipment
- Customized jumper package
- On-site particle counter
- 30+ years of flushing experience
