Used By

Eddie Holmes
CEO, Unissu

Our Uniscore Reports apply Unissu's unique data about PropTech vendors and how our users interact with them to help you identify and select the right solutions for your business.

This edition is the first revised publication of the first UniScore report we ever produced, covering Tenant Experience. To help you understand these companies and the wider market for Tenant Experience solutions, we've added a range of new data points and insights.

You can now discover each company's Operating Markets, UniScore Position and meet the people driving Tenant Experience understanding in Real Estate.

Haltian Surge

After ranking #4 In our first UniScore Report on Tenant Experience, Haltian has continued their march, with a concerted effort to educate and help potential customers on the Unissu platform.

Their appearance in the first report also drove increased interest in their products, all of which has contributed to their climb to a dizzying 1st position.

New Entrants Mark Continued Evolution in Sector

Since the last edition of this report, the sector saw two huge acquisitions - the purchase of OfficeApp by HQ0 and the purchase of Lane by VTS.

This consolidation means space for new entries and those spots are occupied by HyperIn, VTS Rise, Bunk and Envoy.

With over 300 vendors identifying as providers of Tenant Experience solutions, the challenge of navigating the market and finding the top players is a challenging one.

As your trusted PropTech Procurement partner, Unissu will contact the companies in this report and all of the others on your behalf, when you are ready to find the perfect solution for your company.

Eddie Holmes
CEO
Unissu
eddie@unissu.com

Funding

The top 20 firms in our Tenant Experience ranking have raised almost \$476m between them.

\$476m
Raised

This doesn't include the funds raised by Lane and OfficeApp pre-acquisition.

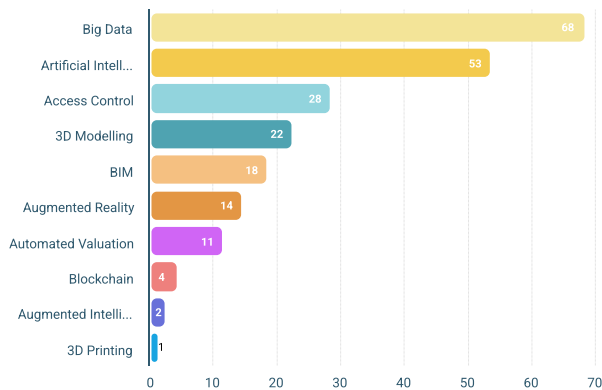

Methodology

We apply our unique algorithm to the proprietary insights derived from how our Unissu users engage with PropTech companies, people and topics, to produce weight adjusted rankings of matching vendors.

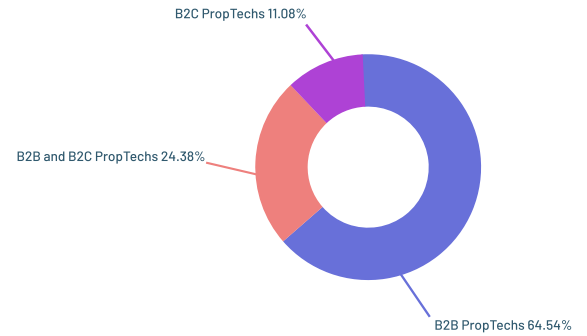

In addition to analysing how the market is interacting with itself, we also layer a range of data points about vendors including their age, funding history, team size and many others to generate a holistic understanding of each firm.

These initial rankings are then parsed by industry experts to ensure that every company we cover provides solutions suitable for the vertical covered in the report.

WINNER

Haltian is a global IoT solution provider and product development company from Finland. Haltian IoT solutions include the Empathic Building digital twin solution for smart buildings & digital workplaces, and Thingsee IoT device solution, the proven IoT technology ecosystem that enables faster IoT launches for mass-scale deployments.

Also, Haltian provides world-class new product development services to help startups get from an idea to a ready product, and in addition, Haltian can customize their Thingsee IoT device ecosystem based on customer-specific needs and requirements so that companies can deploy fast, affordable, and flexible IoT solutions.

Haltian Empathic Building is a digital twin solution that focuses on improving employee well-being and happiness. It is a complete and end-to-end smart office solution that combines technology, culture, and physical space into one. It makes the everyday tasks of the end-user easier and simpler, helping them to find the right workspace, colleagues, share information, and voice their feelings.

Empathic Building also provides valuable data on space utilization, air quality, employee satisfaction, and more from Haltian's own Thingsee IoT device solution but also from other 3rd party hardware and software providers.

Startups To Watch

Despite the relatively well-established nature of the Tenant Experience sector, it's important to keep an eye on those more recently established firms which are making a splash on Unissu.

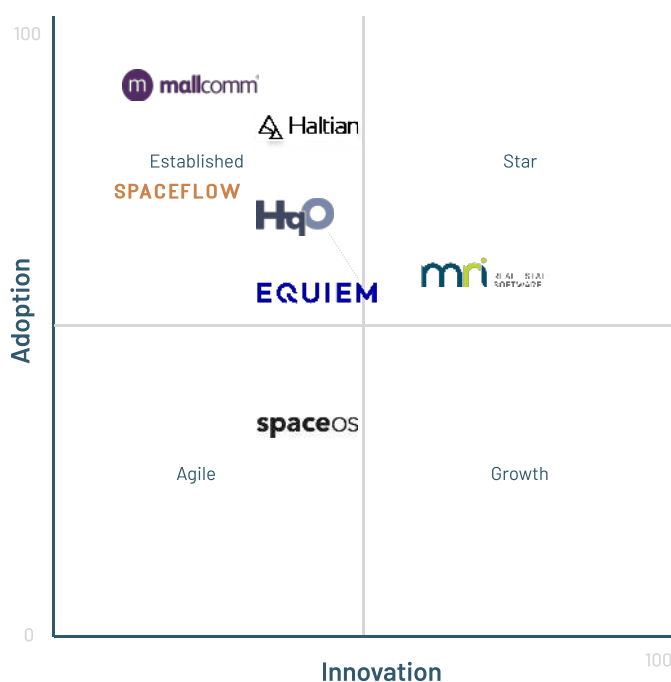

Whether it's because they have found some form of innovation or user experience that is helping them gain traction, or perhaps they are selling in emerging markets, it's key to ensure you're staying abreast of these new entrants.

#	Company	Country	Year Founded	Amount Raised
1	Savvy	United Kingdom	2018	—

UniScore Comparison

One of the data points which goes into our overall UniScore rankings are votes gathered from each company's profile page on Unissu.

These votes are gathered from our community and measure the sentiment and opinion about each firm, particularly how well adopted they are amongst customers and how innovative they are considered to be. Only companies with a certain number of votes are shown below.

FAQ

Q How are the rankings calculated?

A Our UniScore rankings are based on the behaviour we can observe inside the Unissu marketplace.

We utilise a range of datasets to do so. In addition to information about the vendors such as their age and funding, we also analyse how the vendors interact with the marketplace and how the marketplace interacts with the vendors.

Is a vendor appearing in search results more often than others? Do users spend more time looking at a vendor's profile? Are the vendors' team engaging in thought leadership?

All of this and more influences where a vendor ranks in a UniScore report.

Q Are the rankings a recommendation?

A No, our UniScore reports are not a recommendation. Every buyer will have specific requirements around use cases or feature sets unique to them. Our reports are here to support initial discovery and analysis of the vendors that should be considered in the early stages of this process.

We recommend that buyers employ suitably qualified experts or speak to our partner when it comes to choosing the best solution for their particular needs.

Q What areas of PropTech do UniScore reports cover?

A Uniscore reports cover the entire global PropTech industry. We publish a range of regular reports covering some common areas but our analysis is available for any sub sector in any location. Ask us for more information on your specific requirements.

Q Is inclusion or position in the rankings paid for by PropTech companies?

A No, the rankings are not paid for by PropTech companies. The rankings are determined by how PropTech vendors utilise our platform and how others interact with the vendors. Almost all of these interactions take place with no commercial involvement by Unissu.

PropTech companies may purchase services from Unissu that can influence certain data points. For example, search positioning (like Google Adwords) can ensure that they appear in more search queries. However, many data points (like procurement hit rate) cannot be influenced by Unissu.

Vendors may pay to place advertising in our UniScore reports but this does not count towards their ranking.

Q I don't see the area I'm interested in. Can you still help?

A Yes absolutely! PropTech is such a wide field that we can't possibly hope to publish reports covering them all. However, we can produce bespoke reports for any subsector, technology or geography quickly and efficiently, at a flat cost of £2,500 + VAT

Q How else can Unissu help me find the right solution?

A UniScore reports are here to help you move beyond a simple understanding of any particular market and into a deeper dive, exploring the companies, their features and benefits that you may like to adopt in your business.

When you're ready to buy, it's essential to conduct a full market scan.
