

# WHY APPLY TO THE CNC MACHINIST [LEVEL 1] WOMEN + PROGRAM?

## LOVE WHAT YOU DO

CNC Machinists work in clean, modern facilities doing hands-on work while performing mathematical calculations, interpreting complex instructions, and troubleshooting mechanical issues.

## GET PAID TO LEARN

There's no need to take time out from your career to obtain a certification or pay out of pocket to get the right skills.

You will be trained as CNC Machinist while you work, resulting in a nationally recognized professional certification!

## ENJOY A LONG-TERM CAREER

A shortage of skilled tradespeople means that workers with the right combination of technical and human skills are in high demand.

CNC Machinist have strong long-term career prospects and enjoy good benefits and competitive salaries.

## ABOUT THE OPPORTUNITY

The CNC Machinist [Level 1] Women + program places mechanically inclined candidates in full-time advanced manufacturing jobs where they receive a blend of e-learning and hands-on training - all while earning a salary!

The program is partially funded by the Government of Ontario under the Skills Catalyst Fund of the Ministry of Labour, Training & Skills Development.
