

SENIOR FRONTEND-DEVELOPER (ALL GENDERS)

With minubo, we are at the forefront of digitalization in retail. With our innovative approach of the minubo Commerce Intelligence Cloud as a tailor-made product solution for business intelligence and analytics in commerce companies, we make an important contribution to enabling comprehensive value creation from data – and thus to the further development of the industry. With minubo, international customers such as Intersport, Betty Barclay, and tesa are establishing better, data-driven processes and thus create the prerequisites for success in tomorrow's retail world. To achieve this, we rely on analytics and commerce know-how, big data technologies, agile development, excellent customer service, and a strong team spirit. Become part of our team in Hamburg!

YOUR TEAM, YOUR MISSION, YOUR TECHNOLOGIES

- We are an interdisciplinary development team of frontend, backend, ETL and DevOps specialists.
- Together with product management, we take care of the further development of our product: Business Intelligence for Retail as a SaaS solution from the cloud.
- We develop **complex technical solution components** such as reporting, dashboarding and analysis on large data volumes, segmentation of customers and products via flexible criteria, self-service feed APIs as well as algorithmically generated data insights and recommendations – with the look and feel of a modern business application.
- To do so, we rely on agile methods and modern technologies like **Angular, TypeScript, D3, Java, AWS, Spark, Elastic Search, Docker and Kubernetes**.

YOUR RESPONSIBILITY

- You hold a **key position in the conception and further development of our solution** and are co-responsible for the quality of our frontend.
- You are in close cooperation with the product management and actively contribute your ideas on functionality and usability of our solution components.
- You develop technical solution concepts for new product ideas.
- You share your knowledge with the team and are a reliable partner in pair programming.
- You help us to continuously improve technical standards, tools and processes.

YOUR PROFILE

- You have a degree/education with a focus on computer science/informatics.
- You have several years of experience in software development.
- You have experience with Angular or a comparable framework.
- You are strong in developing concepts and enjoy to actively shape frontend architecture.
- You can drive projects forward autonomously and lead them to success through active coordination with other parties.
- Strong skills in both German and English complete your profile.

YOUR BENEFITS

- **Team:** Working at minubo means being part of a great team that sticks together and enjoys pursuing their joint mission just as much as having lunch or regular team events together.
- **Work Atmosphere:** As a grown start-up, we offer flat hierarchies in a dynamic work atmosphere where every idea is welcome.
- **New Challenges:** Our innovative product and the evolving industry offer diverse tasks and new, exciting challenges.
- **Flexibility:** In order to ensure a healthy work-life-balance for our team, we offer flexible work hours. Everyone is free to adapt their day according to their personal preferences.
- **Responsibility:** Everyone at minubo is invited to take over their own responsibilities and projects. We appreciate that we are all responsible for minubo's success.
- **Career Development:** We support your education and career objectives and always do our best to make your wishes come true.
- **Permanent Contracts:** We offer permanent contracts.
- **Central Location:** Our office is located in the heart of Hamburg – between the harbour and city centre with a variety of lunch options.
- **HVV:** We support our employees' public transportation tickets (HVV). Due to our central location, our office is easily accessible with public transportation.
- **Sponsored Sport:** We provide sponsored company sport offers at Fitness First and the Urban Sports Club.
- **Company Pension Scheme:** We offer a company pension scheme.

We are looking forward to receiving your application including salary request and possible starting date.
