

THE VISION SERIES

A FRESH SPIN
ON PROVEN QUALITY

SUPERIOR CRAFTSMANSHIP MEETS MODERN DESIGN

Engineered to Inspire

The Vision Series, Federal Industries' newest line of European-inspired fresh food display cases, sets a bold new precedent in food merchandising. Thoughtfully crafted with an expanded viewing experience and clean, minimalist styling to dramatically elevate the appeal of your merchandise.

Create a seamless transition to your space and décor with a full range of customizations and accessories: Optional glass sides to maximize engagement, curved or straight glass profiles, enhanced lighting, shelving, and finishes.

Models are engineered to suit your specific product requirements, be it a refrigerated, non-refrigerated, or heated display solution. Our rigorous testing ensures superior reliability, hassle-free maintenance, and promises to keep the **vision** for your venue in clear sight.

Product Range

Choose from two profile options. Each is available with either glass or solid side panels for a custom design crafted for your space.

Available in heated, refrigerated, or non-refrigerated specifications for unrivaled preservation of your fresh food merchandise.

Straight Profile with Glass Side

Straight Profile with Solid Side

Curved Profile with Glass Side

Curved Profile with Solid Side

Presentation

Expanded View

Dramatically enhanced visibility from the front and side perspectives allows for more engagement, more appeal, and increased return on investment.

Display Lighting

Additional LED shelf lighting option provides more impactful merchandising, better visibility, and shows off the intricate details of your products.

Signature Design

Elevate your decor and bring your venue to life with a variety of custom finish options. Cases can be optionally fitted with rear hinged or sliding doors, security covers, and casters*.

Better Accessibility

Features like a lowered bottom deck and custom shelf placement enhance customer engagement and boost product sales.

**See individual cases for available options*

Performance

Superior Quality

Medex® fiberboard end panels are completely sealed against moisture, helping to keep your case free from condensation damage.

Universal Breathe

Whether freestanding or up against a wall, your unit has the versatility to vent in any configuration.

Reversing Fan Option

This new feature allows the condensing fan motor to reverse direction during defrost, reducing buildup of dust and debris that can gather on the condenser coil. This allows your merchandiser to run more efficiently between cleanings, prevents potential down time, and extends the life of the compressor.

Convenience

User-Friendly Design

Digital temperature readings and easy-access controls provide a better user experience for employees. The front grill is simple to remove for convenient cleaning, and glass sides are easy to replace in the field.

Hassle-Free Maintenance

Key components are efficient and easy to access keeping maintenance costs low.

Technology

Automatic Defrost System

Detects when a defrost cycle needs to run increasing operating efficiency, decreasing temperature fluctuations, and reducing costs associated with energy and maintenance.

Multi-pane Tempered Glass

Durable, high-performance glass side panels are built with multiple panes for increased energy efficiency and insulation compared to standard, single pane glass.

Endless Combinations

Whether you're seeking an integrated design or a presentation that pops, your case can be customized with your choice of exterior laminates, custom wraps and more. Joining kits are available to create a continuous line up.

❄️ REFRIGERATED

- Adjustable metal shelves with price tag molding
- Stainless steel display deck
- Energy-saving night curtain
- 3500K LED top light
- Leveling legs

Refrigerated models feature clean, distinctive designs with built-in automatic defrost and ventilated refrigeration. Thoughtfully crafted with impulse sales in mind, Vision Series self-serve designs make it easy for customers to engage with your merchandise. Moisture-resistant end panel construction keeps your merchandiser looking newer longer. Refrigerated models come in the same heights as non-refrigerated and heated cases for continuous line-ups. Ideal for fresh products, pastries, and beverages.

Refrigerated Sizes Available:

Straight End		Curved End

N° NON-REFRIGERATED

- Adjustable metal shelves with price tag molding
- Stainless steel display deck
- 3500K LED top light

Vision Series non-refrigerated models feature sleek, sophisticated designs built to increase engagement and drive impulse sales. Cases are built to last, with a sturdy powder-coated steel base and a stainless-steel display deck. Non-refrigerated models come in the same heights as refrigerated and heated cases for continuous line-ups. Intended for dry bakery goods, instant meals, and snacks.

Non-Refrigerated Sizes Available:

🔥 HEATED

- Independently controlled adjustable stainless steel shelves with price tag molding
- Removable stainless-steel heated display deck
- Stainless-steel interior
- 3500K LED top light
- Leveling legs

Vision Series innovative heated display solutions are smartly engineered with independently-controlled shelving to suit a wide variety of menu items. The modern, self-serve designs are thoughtfully crafted to boost customer engagement and encourage impulse sales.

Front-accessible digital temperature controls are easy to reach for a user-friendly experience. Heated models come in the same heights as refrigerated and non-refrigerated cases for continuous line-ups. Ideal for delicatessen, pizza and snacks.

Heated Sizes Available:

Straight End		Curved End
