RE: Price Increase Implementation March 7, 2022  
90 Day Notice

Dear Valued Partners,

On March 7, 2022 Champion and Bi-Line Conveyors will be implementing a price increase. Labor shortages and supply chain bottlenecks have yet to alleviate and continue to impact our cost structure. In particular, China’s reduction in magnesium production is driving the global stainless prices even higher. Champion has worked to mitigate our cost pressures, but a price increase is necessary to offset the dramatic increases we are seeing in our supply chain. We have been paying a premium on many items to maintain competitive lead times on our equipment while ensuring the necessary quality. Our increase details as follows:

Product Line	Percentage Increase
Undercounter, Glasswasher	5%
Door Style, single tank rack	8%
Two tank rack, Flight machines	10%
Bi-Line, Pot Pan Washers	10%
All other ancillary products	10%

Even with this increase, you will find that Champion is still in a very competitive pricing situation in the warewashing market. We continue to strive to be the Total Dishroom Solution Company for you and your valued customers.

Please let us know if you have any questions regarding the increase and we thank you for your support.

Best Regards,

Jay Bravinder  
Vice President of Sales
