

NORTHSPYRE +

Harness The Power
Of Our Seamless
Integration

NORTHSPYRE

Northspyre and Yardi are fully integrated to ensure even the most complex development projects seamlessly deliver on time and on budget.

AUTOMATIC INTEGRATION

Northspyre automatically syncs with Yardi-- ensuring your data is consistent and your team isn't wasting time reconciling inconsistent numbers across the two systems.

OPTIMIZED PROJECT DELIVERY

Northspyre's two-way integration with Yardi Voyager enables accounting and development teams to better collaborate with project leadership, vendors and key stakeholders.

KEEP EXISTING WORKFLOWS

Northspyre syncs with your existing email-based workflow and automatically extracts salient data from project documents like invoices, contracts, proposals, change orders, and certificates of insurance.

REAL TIME INFORMATION SYNC

The two systems work hand-in-hand to expedite payments and ensure accounting teams' general ledgers are up-to-date, with information automatically syncing between two systems.

OVERNIGHT IMPLEMENTATION

Northspyre can be implemented overnight without a painstaking change management process that bogs down new software adoption.

HOW IT WORKS

If a member of the project team approves an invoice within Northspyre, that invoice – including the appropriate property ID, general ledger account number, vendor details and corresponding invoice information – will be reflected in Yardi Voyager.

Conversely, payment details associated with that invoice will automatically flow from Yardi Voyager to Northspyre.
