

MailHub

Digital Mail Delivery

What is MailHub?

MailHub is a secure, compliant and trackable digital solution designed for accurate, timely delivery of customer documents and outbound communications. This solution allows your customers to securely view their mail from their tablet, smartphone or desktop computer — anywhere, anytime.

Important documents and be securely and compliantly delivered, and actions — such as digital document signing with trackable technology — can be requested. MailHub can complement your existing printed outbound communications initiatives or be used as a stand-alone technology solution.

Why MailHub?

United States Postal Service (USPS) delivery and processing delays, rising postage costs and operational challenges are triggering short- and long-term challenges for businesses across the country.

MailHub allows businesses to mitigate the uncertainty of continued and ongoing USPS disruption and control the accurate, timely delivery of messages to customers.

Contact us for a MailHub demonstration and learn about how EDM can deliver this impactful solution for you.

Benefits of MailHub:

- Request and enable immediate calls to action — such as approvals or signatures — to reduce costs and improve efficiency in your business
- Trackable delivery ensures the right message is received by the right recipient in a timely manner
- Reduces or eliminates postage costs incurred through traditional print and mail initiatives
- Faster customer response times and higher conversion rates
