

# Houston, We Have A Solution

## Custom Enclosures From Our Floor to Your Door in Half the Time.

Welcome to the  
**Rapid Design Center**  
From Our Floor to Your Door, We Deliver Modifications Faster

## Houston Rapid Design Center Delivers.

Rittal's expansive warehouse and Rapid Design Center is changing the game in Texas in custom enclosure modification. Our EPLAN engineering team can quickly convert your DXF and CAD drawings directly into the laser cutting Perforex machine for a faster turnaround. And our expansive supply of Rittal enclosures and automated modification machinery speed up modifications, and help ship your custom enclosures quicker.

With the Rittal LC and BC Perforex machines, the drilling, tapping and milling of enclosures is completely automated in a single cycle. Holes, threads and cutouts can be created on surfaces of an enclosure, such as mounting plates, doors, sidewalls, and the enclosure housing. All standard materials used in enclosure manufacturing can be machined, including steel, stainless steel, aluminum, various plastics, fiberglass and copper.

Our highly-trained team can assemble all accessories offered by Rittal based on your required configuration.

We can also help complete your customized solution by integrating additional doors and mounting panels or suite enclosures together. And our staff can support you with an extensive local supply of Rittal products.

## Secure Your Competitive Advantage for Industry 4.0

As data flows through the machinery of Industry 4.0, it's vital for manufacturers to have more control of the supply chain's inventory and delivery processes. And it's equally important to have a compatible supply chain partner, who can source that information to their customers.

By combining our capacity as the world's largest enclosure manufacturer and leader in modification machine engineering, Rittal is positioned to accelerate your growth, now, and in the future.

Our complete catalog of Rittal products, combined with our integrated, data-driven workflow, and automated modification process drives the supply chain of the future for you. By making the most of our engineering expertise and the automation know-how of Rittal, we are able to manage the seamless, digital workflow of the quotation, virtual prototype and modification process.

**This delivers the efficiency needed to meet your supply needs at the speed of Industry 4.0.**
