

FSC[®] Certified Digital Cartons

Nosco is now chain-of-custody certified through the Forest Stewardship Council[®] (FSC[®]) for digital cartons at our On_Demand Solutions Center (ODSC) in Bristol, Pennsylvania.

FSC[®] CERTIFICATION

Through Nosco's chain-of-custody certification through FSC[®], we are able to provide customers with FSC-certified materials that have been certified at every stage of the process. While many print converters may carry FSC materials, only FSC-certified print converters have completed the proper chain-of-custody requirements for truly sustainable packaging. As a result, Nosco has its own unique identification number (shown right).

The mark of
responsible forestry

ADDITIONAL ECO-INITIATIVES

- Sustainable Forestry Initiative[®] (SFI[®]) certification for cartons and inserts.
- EcoVadis Silver Sustainability Rating – Nosco is working towards earning gold.
- Partnership with HP Indigo to help implement processes that reduce waste, maximize efficiency and utilize eco-ink systems.
- Nosco's cross-functional Sustainability Team that reviews processes, products and sustainability programs to ensure the organization is conserving energy, automating where possible, and developing products that are recyclable or compostable.

FUTURE ECO-INITIATIVES

Throughout 2021 and beyond, Nosco will work to develop a full portfolio of sustainable alternatives for each of our core product lines – cartons, labels, inserts and flexible packaging.

- Recyclable
- Compostable
- Post-Consumer Waste (PCR)
- Engineering with Reduced Materials and Energy
- Zero-Waste Options

Additionally, the Nosco Sustainability Team is excited to bring customers several learning opportunities throughout the year with sustainable packaging events, training sessions, and sustainable packaging scorecard reviews!
