

# BREAKING DOWN DATA MIGRATION

Moving your data from one system to the next doesn't have to be painful. Step through your data migration journey with 3-GIS.

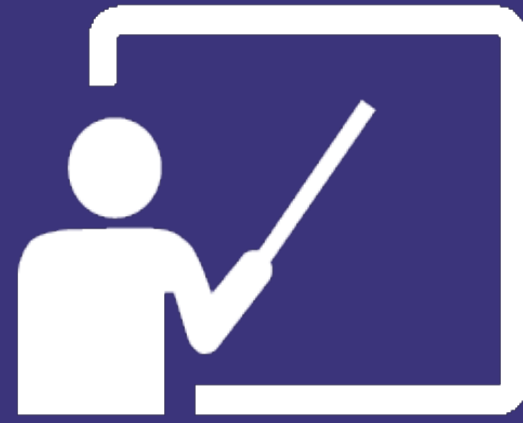

## Data evaluation

Send samples of your existing data from CAD and other formats.

## Data model workshop

Meet with us to decide on a schema to meet your needs.

## Runs, reports & feedback

Automated data transfer is run in iterations with manual cleanup and reports generated each time.

**Final test run**  
All feedback is applied, and data is run through a final test.

## Production run & cut over

Final adjustments are made, and data is made ready for delivery.

**Final delivery**  
Data is delivered with thorough reporting of all updates.
