

Tidal Workload Automation Replacement

Improve the workflow visualization, enable self-service automation, and drive automation in real-time - across your hybrid IT environments.

Replace Tidal Workload Automation with Stonebranch UAC and Experience the Future of Automation Solutions

Stonebranch Universal Automation Center (UAC) simplifies how IT Ops controls and manages end-to-end IT processes. Enterprises replace Tidal Workload Automation with Stonebranch UAC to improve the workflow visualization, enable self-service automation, and drive automation in real-time - across their hybrid IT environments.

Tidal Workload Automation, formerly known as Cisco Workload Automation (CWA) or Cisco Tidal Enterprise Scheduler (TES), was acquired by Dillon Kane Group (DKG) in 2017. With a well defined and automated conversion approach, Stonebranch has a long history of helping enterprises to migrate from Tidal Workload Automation to

Universal Automation Center. You can now orchestrate the automation across your entire hybrid IT environment. As an enterprise-grade workload automation solution, the UAC is designed with ease-of-use, self-service enablement, and scale in mind. The UAC features a highly visual workflow designer, proactive monitoring and alerts, jobs-as-code, infrastructure-as-code, and the flexibility to be deployed on-prem or in a SaaS environment.

Advantages of UAC

- **Advanced Product Architecture**
UAC has an easy to use web interface. No client needed for installation.
- **Visual Workflows**
Use the highly visual, drag-and-drop workflow designer to create and orchestrate IT tasks and jobs in real-time.
- **Product Evolution**
Future proof your investment with regularly scheduled product enhancements.
- **DevOps Enabled**
Jobs-as-code, infrastructure-as-code, and bundle and promote capabilities help connect the dots between DevOps and IT ops.
- **Reporting and Monitoring**
Powerful activity reports to monitor critical batch services along with notifications.

Your Real-Time IT Automation Journey Starts Here

Discover the alternative, and drive automation in real-time. Stonebranch provides a truly universal job scheduling and workload automation platform that can be used with any of the marketed scheduling products, other third party vendor scheduling products, and even homegrown solutions.

Take advantage of the future-proof Universal Automation Center, the only real-time IT automation platform designed to centrally manage and orchestrate tasks and processes

across hybrid IT environments - from on-prem to the cloud. Start your real-time IT Automation Initiative now by [scheduling a demo](#) with us.
