

# Tidal Workload Automation Replacement

- Improve workflow visualization
- Enable self-service automation
- Implement jobs-as-code and infrastructure-as-code
- Drive automation in real-time
- Deploy on-prem or in a SaaS environment
- Automate across your hybrid IT environments

**Improve workflow visualization, enable self-service automation, and drive automation in real-time across your entire hybrid IT environment.**

Stonebranch makes it easy to migrate from Tidal Workload Automation to the Universal Automation Center (UAC) so you can experience the future of service orchestration and automation solutions.

Tidal Workload Automation – formerly known as Cisco Workload Automation or Cisco Tidal Enterprise Scheduler – was acquired by the Dillon Kane Group in 2017. With a well-defined and automated conversion approach, Stonebranch has a long history of helping enterprises to migrate from Tidal Workload Automation to Universal Automation Center.

**UAC simplifies how IT Ops controls and manages end-to-end IT processes.**

You can now orchestrate the automation across your entire hybrid IT environment. As an enterprise-grade workload automation solution, the UAC is designed with ease-of-use, self-service enablement, and scalability in mind. The UAC offers a visual workflow designer, as well as proactive monitoring and alerts.

# Your Real-Time IT Automation Journey Starts Here

Future-proof your operations with the Stonebranch UAC — an advanced IT automation platform designed to centrally manage and orchestrate processes across hybrid IT environments, whether on-prem or in the cloud. This truly universal workload automation and orchestration platform easily integrates with any application or system, including third-party scheduling products and homegrown solutions.

## 1. Advanced Product Architecture

Available via SaaS or on-prem, the UAC offers an easy-to-use web interface. All functions are securely available from a browser — no client installations required.

## 2. Visual Workflows

Use the UAC's visual drag-and-drop workflow designer to create beautiful automation workflows that orchestrate IT jobs in real-time.

## 3. Product Evolution

Regularly scheduled product enhancements keep up with your digital transformations and help future-proof your investment.

## 4. DevOps Enabled

Jobs-as-code, infrastructure-as code, and bundle-and-promote capabilities help connect the dots between DevOps and IT Ops.

## 5. Proactive Reporting and Monitoring

The UAC's standard reporting capabilities allow you to easily view audit information, forecasts, and activity reports. Proactive monitoring and alerting lets you know when there's an issue — often before it has an impact.

**Schedule a demo now to begin your real-time IT automation transformation.**

## Stonebranch Simplifies Real-time Automation

Stonebranch builds IT orchestration and automation solutions that help enterprises break down automation silos while gaining centralizing control of automated jobs, tasks, and workloads.

The Universal Automation Center platform supports your entire hybrid IT environment, including on-premises, cloud, and containerized microservices. The platform runs automation in real-time, responds intelligently to business needs, and integrates with just about any application or platform you can throw at it.
