

FREE 30-DAY TEST DRIVE

Endpoint Detection and Response

We're here to help protect your remote and endpoint working environments during COVID-19.

24x7x365 PROACTIVE THREAT HUNTING MONITORING, RESPONSE AND REMEDIATION

Protect All of Your Endpoints

We know today's unprecedented and ceaseless pandemic has caused most organizations to extend their remote working policies. This makes identifying endpoint threats, and securing them, even more difficult. Nuspire is here to help. We are making our active threat hunting and proactive monitoring, response and remediation available to you for a **free 30-day test drive***.

Nuspire's award-winning Endpoint Detection and Response Service delivers next generation endpoint protection backed by a highly skilled 24x7x365 security operations center (SOC) to:

Block threats before compromise with next generation antivirus, fileless and ransomware protection and machine learning.

Continuously detects threats with advanced endpoint detection and response, threat hunting and dynamic analysis-around the clock.

Respond completely for attack surface reduction, endpoint isolation and retrospective security.

Gain the 24x7x365 security expertise to partner with your team to hunt down, proactively monitor and respond to advanced threats.

Sign up today as this limited opportunity ends September 30, 2020!
