

The ModuleQ AI Platform

Surfacing the missing pieces of your workday.

ModuleQ empowers front-line professionals with mission-critical business insights that are personalized and prioritized for each individual user.

Relief from information overload

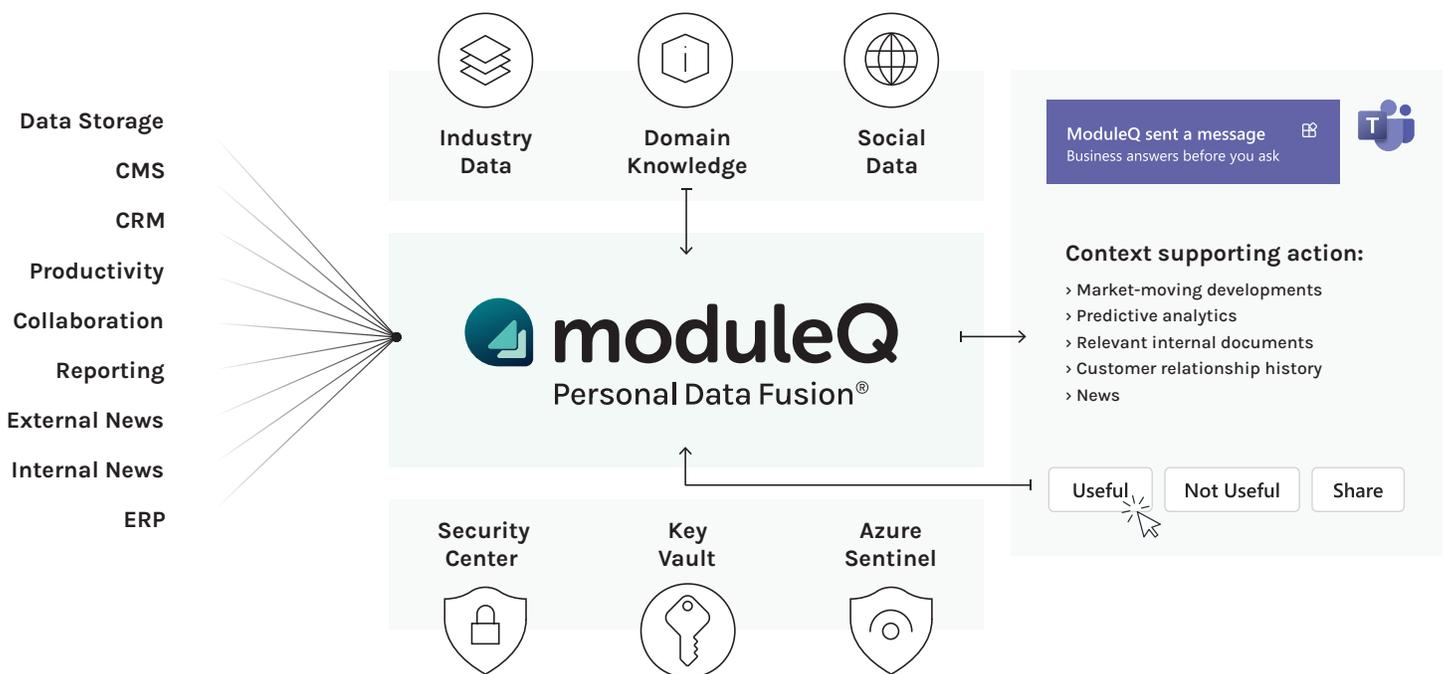

Front-line professionals are being overwhelmed with the vast amount of information, processing and prioritizing they need to do on a daily basis. ModuleQ's Personal Data Fusion® leverages your personal information and past actions and filters it through records in your organization and quality external data sources. Only content or insights that pass this rigorous filtering and prioritization process are bubbled up to the user, helping them become more efficient, intelligent and reducing digital fatigue.

Accelerate digital transformation

ModuleQ's open architecture and flexible integrations embraces and extends existing infrastructure into Microsoft Teams, Salesforce CRM and open APIs. This experience is secured within the customer's own compliance perimeter on Microsoft Azure.

Increase employee engagement

- » An Insights Engine that learns without extra work or configuration
- » Less time entering search terms and searching for information
- » Information shared based on topics that matter rather than popularity

Business answers before you ask.

Surfacing business data as actionable information, with an embedded AI experience.

[How Design Thinking Drives Innovation](#)

Design thinking minimises the uncertainty and risk of innovation by engaging customers or users through a series of prototypes to learn, test, and refine concepts. Design thinkers rely on customer insights gained from real-world experiments, not just historical data or market research... [view entire story](#)
