THREATS

Malware Detected

#	Malware Name	Malware Type	Counts
1	JS/Badarc.QVC!tr	Virus	2

Malware Victims

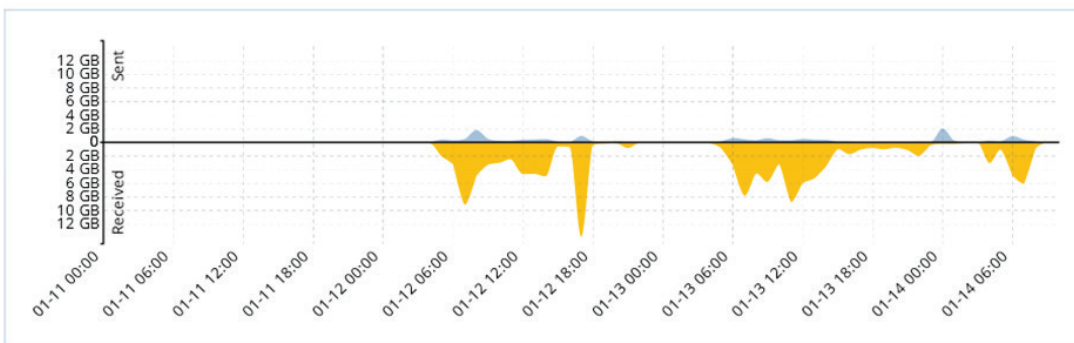

#	Victim Name (or IP)	Counts
1	Usr-26058	2

Malware Source

#	Malware Source	Hostname (or IP)	Counts
1	IPv4-51724	23.229.134.99	1
2	IPv4-51724	205.251.129.211	1

Threats report shows the threats detected and their criticality on the firewall within the reporting timeframe. Each threat is listed with an HTML link to allow further research on the threat.

TRAFFIC BANDWIDTH

The traffic bandwidth by direction shows the amount of usage both incoming and outgoing. The graph illustrates the traffic for the time period specified.
