## Single Property Sites

How to Get Started

Use Surefire CRM's Single Property Site feature to generate dynamic property websites in minutes.

Follow these steps to quickly create a Single Property Site for your real estate partners using their listing's MLS ID.

### 1 Access Single Property Sites in Surefire

From the main menu, click Marketing to expand the options and then click **Single Property Sites**.

This will open Single Property Sites in a **new tab**.

2 Add a New Listing

Create a **New Listing** or click on **Edit Listing** to work with an existing listing.

Master Property List
Grouped by Office and Agent

Filter by: | Town | Zipcode | Price | Date | Status | Default | **VIEW ALL** | **ADD NEW LISTING**

Click Image to Open Site	Agent	Listing Info	Date	Status	Search:
		4566 NE CESAR E CHAVEZ BLVD Portland OR $925,000 5/5/2580	05/24/2017	Active ▾	Edit Listing / Send Email / Copy Link / Delete

Showing 0 - 1 of 1

3 Add Your Partner to Co-Brand

On **Step 1: Select Partner**, choose the **Contact Type** from the dropdown and then select your **co-branding partner**.

4 Search for Your Partner's Listing

On **Step 2, enter the MLS number** for the listing. This will populate your listing with property details.

Congrats! You will now have your partner's listing connected to Single Property Sites.

Help! I can't find my listing.

Is your MLS number not showing up?
No problem. Just follow the steps below.

How to Add Your Listing to Single Property Sites

We receive our listings from ListHub, an industry partner which connects to **over 600 MLS feeds.**

The head broker in charge can register online with ListHub to use the service for free. **Click here to register.**

After the Broker registers, they can choose to syndicate their listings to **PropertyPath (that's us!)**

Once they share their listings with **PropertyPath,** the listings will appear inside of Single Property Sites for use.
