

Combatting COVID-19 with Remote Work Capabilities

A 48-hour Accelerated Teams Deployment

With the unfortunate occurrence of COVID-19 affecting growing numbers of people daily, organizations, like yours, are trying to understand how they can help their employees stay healthy and productive. Many organizations are suggesting that their workforce telecommute, and some provinces and States are even mandating it. With this reality, it's important that we're all prepared for Remote Work capabilities.

ProServeIT has prepared a 48-hour rapid deployment of Microsoft Teams, to assist organizations with their crisis management and communications.

Deliverables & Activities

Deployment of Teams Voice, including DID number, audio conferencing, call queues, communications credits, & more.

Assistance with Teams Collaboration, including Teams portal management, best practices, document collaboration demo, and more.

Train the Trainer workshop, around collaboration features like creating Teams & Channels, Security, and using OneDrive/SharePoint document collaboration.

Learn how to mobilize your workforce by enabling remote internal/external voice and visual communication.

Enable immediate use of Teams as your audio/video communication and document sharing platform.

Configure and enable all your users with phone system capabilities and DID numbers.
