

# Business Intelligence Workshop

Get Started!

Enable your organization to make better-informed business decisions by taking advantage of Business Intelligence!

\$4,000

Companies looking to get rid of manual data processes.

1 day

## Features & Benefits

### Learn best practices & industry standards

around Business Intelligence and how you can use BI to your benefit in your organization.

### Review data sources with data experts

to solidify which KPIs and metrics you want to report on, & explore Business Intelligence reporting possibilities and capabilities.

### Explore Business Intelligence reporting

possibilities and capabilities for your organization.

## Deliverables

### Consider KPIs and Metrics you want to track

within your team and organization, and where those KPIs and metrics will be pulled from, so you can ensure they're available.

### Understand the current reporting process

you have (if any), and what you want future reporting processes to look like.

### Discuss your BI Roadmap

to get an estimate of how long your project might take, and a list of recommendations on where to begin first.
