

Where to Start to Protect Your Organization

The level of security we typically see in organizations...

Level 1

- ✓ Basic Antivirus
- ✓ Non-Tier 1 Firewall, and/or out of support
- ✓ No Patching or Ad Hoc Patching
- ✓ Basic Back-Ups or No Back-Ups

Where organizations should aim to be (at a minimum)...

Level 2

- ✓ Enhanced Endpoint Protection
- ✓ Mailbox Protection
- ✓ Identity Protection (MFA)
- ✓ Tier 1 Firewall in support
- ✓ Patching All Devices
- ✓ Independent Back-ups

Where organizations can find added protection...

Level 3

- ✓ All corporate Applications
- ✓ Integrated Identity
- ✓ Security Posture Management
- ✓ Mobile Device Management (MDM)
- ✓ Additional security tools as needed
