Darius's Story

Darius, a project manager, is eager to return to his usual hybrid work solution of working part-time from home and part-time from the office, and is looking for solutions that will allow him to do so in a safe way.

Darius used to work part-time from home, and enjoyed the flexibility that this offered - he could go into the office and see his colleagues and friends, or work from his home office.

When COVID-19 hit, Darius's organization shut down the office and moved everyone to full remote working. Darius, with his gregarious and outgoing nature, found it difficult to adjust to the new, isolated set-up.

After five months of working from home, Darius is looking forward to getting back to his old arrangement.

Darius's company implemented a number of solutions that enabled those who wanted to return to the office to do so in a safe manner, while allowing those who wanted to work remotely to stay connected to their colleagues, no matter where they were.

Office Capacity Manager App

Starting at $0.75/user/month

Office Capacity Manager app helps office reopening safe for everyone. This device-friendly app helps companies to successfully manage who's in the office and allow them to reserve desk space to avoid overcrowding.

Windows Virtual Desktop

Starting at $8,500 CAD

Windows Virtual Desktop (WVD) provides remote workforce with the same virtual environment where they can access all the business applications and documents. This ensures that employees can securely access all corporate data.

1-Day Teamwork Workshop

Free Workshop

Effective communications and collaborations tool is a must for all organizations.
This Microsoft-funded, 1-day Teamwork Workshop* is designed to help organizations assess their needs and create an efficient and secure roadmap for Microsoft Teams implementation and adoption. *Conditions apply.
