IT Roadmap

Understand the Most Efficient Way to Leverage IT as a Critical Business Advantage

ProServeIT is offering an advisory engagement to help management by reviewing and measuring two aspects of their business (business needs and IT capabilities), performing a gap analysis and providing recommendations to close the gap.

What is the outcome of the engagement?

You will receive an IT Roadmap, a detailed report (typically 40-70 pages) with recommendations that can help you close the gap between your business needs and IT capabilities.

Optional outcome: Assistance to fulfill the recommendations
- By doing portions of the actual work to support your IT team
- By providing end-to-end managed services

What is involved in the engagement?

1. One-on-one interviews with key business stakeholders
2. An audit of your IT plan and capabilities
3. Gap analysis between the findings from phase 1 & 2
4. IT Roadmap (i.e., recommendations to close the gap)

Who is this engagement for?

IT Roadmap is for business leaders who:

- Want to understand how to manage and leverage IT as a critical business advantage, and better align IT staff and the business.
- Have experienced IT issues and/or significant systems failures.
- Need to upgrade hardware and software.
- Want to close the gap between the business needs and IT capabilities.
- Face significant changes, including mergers, expansion, etc.
