

## Swiss Wood Business Cards

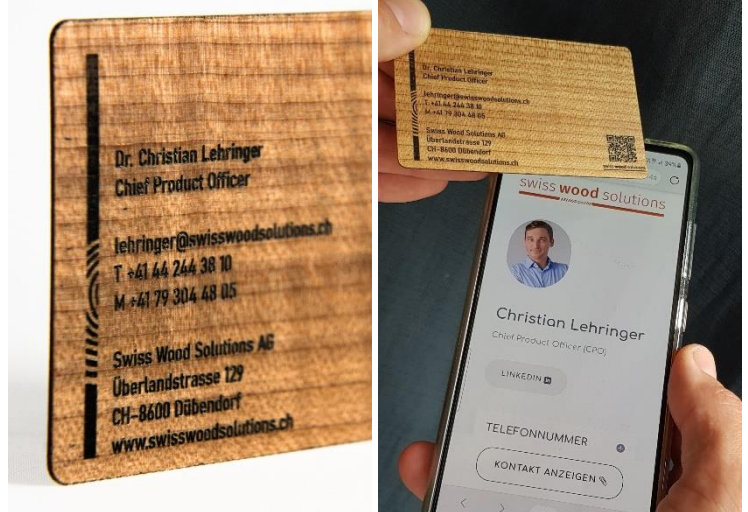

Real wood, smart and contactless

Sustainable cards that leave an impression without leaving waste!

### Product features

- Card body made of 100% real wood, no plastics! Each card is a unique ambassador of nature.
- Various wood species available from domestic and sustainable sources: Schweizer Holz and FSC/PEFC (certifications pending).
- Extraordinary haptics: pleasant to touch, smooth or structured.
- Adjustable bending stiffness: horizontal or vertical wood grain orientation.
- High surface hardness and scratch resistance.
- Customization by laser-engraving or UV-printing.
- NFC/RFID-chip embedding possible.
- OCR such as QR-code or Barcode possible.
- Waste-free: saves paper and is compliant with a circular economy.
- Hygienic and Corona-conform: reduces physical interaction through contactless networking.
- Optional: business card data management through our software solutions partners.

**Swiss Wood Solutions** is a start-up company in fields of novel, wood-based materials and products. We provide pioneering product solutions made of sustainable wood from domestic forests. Our innovations help preserve endangered tropical woods and replace harmful plastics.
