

Escape 21C

Escape
TRAILER *Built for you.*

ABOUT THE ESCAPE 21C

The Escape 21C is what we refer to as the “21 Classic”. It’s the original layout with a North/South bed making it easier to get in and out of without crawling over each other. The alternative layout is the 21NE.

All Escape travel trailers are manufactured with a 100% molded fiberglass body. This allows for the construction of a true lightweight trailer, with dry weights starting at 3465 lbs. The E21C comes standard with a large two-person bed in the front, full wet bath, and a large dinette in the rear that converts to a two-person bed.

The frame is constructed with box steel and a rubber ride torsion axle suspension creating a solid foundation with a smooth ride. The interior is professionally finished with your choice of Oak, Maple, or Contemporary cabinetry, large windows, high-grade vinyl flooring and a unique insulated vinyl headliner/wall covering.

Every Escape trailer includes a long list of standard features and an extensive options list available for even more personalization. Every trailer also comes with a limited two-year warranty. The body of the trailer is constructed from top and bottom of fiberglass shells which are bonded together with glass reinforced fiber to create a true one-piece unit.

The roof has a raised dome allowing water to run off rather than pooling. This greatly reduces any chance of water penetration while maintaining a strong, long-lasting lightweight trailer.

The Escape’s aerodynamic and lightweight design eliminates the need to invest in a large towing vehicle in contrast to a conventional RV trailer. Most trucks and SUV’s are capable of towing smaller Escape trailers without a noticeable increase in gas consumption helping to keep the investment for travel to a minimum.

Our customers are pleased that Escape trailers offer ample interior storage space, especially in the large overhead cabinets. Light-colored hygienic wall coverings and large windows throughout each unit creates the feel of a more roomy, bright space.

Escape trailers utilize real wood for cabinet doors and plywood for tables, countertops, and the floor. Escape 21C is a perfect blend of high-quality, design and function both inside and out.

E21C BASE FEATURES
