**It's the Quick, Easy Way to Save Up to 30%  
on Your Compressed Air System Energy Costs Now<sup>1</sup>**

**While Improving System Efficiency for the Future**

***QUICK***

- > Rapid Leak Detection
- > Real-Time Repairs

***EASY***

- > Special Package Pricing
- > Instant Phone Quote & Scheduling

***DONE***

- > Detailed Report Upon Completion
- > Documents Your Calculated Savings

## Compressed air system leaks cost you 3 ways!

- > Leaks waste up to 30% of your compressed air energy costs.\*  
Losses can exceed 50% where no air maintenance is performed and leaks go undetected.
- > As a result, costly capital equipment has to compensate for the waste, leading to unnecessary wear, additional maintenance and premature failure.
- > If you don't recognize and address the issue, you also may be purchasing additional compressors to compensate for the waste as well.

### Wasmer's Find & Fix Spring Special is the quick, affordable solution to costly air leaks!

Everything you need to take care of this critical issue is all here in one convenient package. Simply get a quote in minutes and get scheduled to check off a major "to-do" for 2021.

**Detect leaks up to 10X faster!** Our trained technicians use the latest acoustic imaging technology to detect compressed air system leaks faster than more traditional techniques.

**Immediate fixes for immediate savings!** The problem with detection alone, is that companies never seem to find the time and resources to fix the leaks once they're identified. Or, quick fixes are made that don't take of the problem. With our professional repairs, you can count on seeing the savings you expected – sooner rather than later.

**A comprehensive report is provided upon completion!** We record leak details, including size and location. We also document the repairs made and calculate your resulting savings and productivity improvements.

**Attractive package pricing!** We want to make this program one that any manufacturer can take advantage of. So, here's the deal: 3 cents/sq.ft. + \$1.50/hp of your system brings a Wasmer trained technician to your facility to conduct a comprehensive compressed air system inspection for leaks. Remediation can be done on site, in real time for \$95/hour. Leak repair not to exceed \$45 per leak.

**No purchase order required. All major credit cards accepted.**

**Sign up for your choice of ongoing programs to save even more!**

- > Save an additional 5% when you enroll in our quarterly Find & Fix program for 1 Year.
- > Save an additional 10% by extending the program to 3 Years of leak protection.

**To improve system productivity and reduce related energy costs by up to 30%, call 920-827-2300 or visit [wasmerco.com](http://wasmerco.com) to register for our Find & Fix Special!**

**Offer Expires March 31<sup>st</sup>, 2021!**
