

FERTILIZER COSTS GETTING TOO HIGH?

REDMOND

*YOU'VE BEEN HEARING ABOUT PUTTING REDMOND MINERALS ON YOUR SOIL
NOW IS THE TIME TO TRY IT*

WHY USE REDMOND MINERALS?

1. Improves soil quality- minerals to awaken and stimulate microbe activity
2. Higher feed quality- Higher RFQ and TDN
3. Simple to use

HOW TO USE REDMOND MINERALS?

1. Reduce your traditional inputs by 50% or more for most crops. 25%-50% for corn.
2. Use Redmond SR 65 or SR 50 according to the following conditions.

Application Instructions						
SOIL TYPE	CEC	SR35	SR50	SR65	REDMOND SALT	REDMOND CONDITIONER
Sand	1 - 5			200 lbs/Ac broadcast split applied, 2 x 2, strip till	50-100 lbs/Ac split applied broadcast & or 3-5 lbs/Ac liquid foliar or irrigation applied 3-5x year	100-200 lbs/Ac split applied broadcast
Fine Sandy Loam	5 - 10			200 lbs/Ac broadcast split applied, 2 x 2, strip till		
Silt Loam	10 - 15		100-200 lbs/Ac broadcast, 2 x 2, strip till			50-100 lbs/Ac broadcast
Clay Loam	15 - 30	100-200 lbs/Ac broadcast, 2 x 2, strip till				
Heavy Clay	> 30	100-200 lbs/Ac broadcast, 2 x 2, strip till				

Foliar application of Redmond Salt at 4 lb/ac 4X/year also works well. Read about the research we've conducted for the past several years on our website under the "Education" and "Blog" tab headings at redmondagriculture.com
