Product Guide

MORE THAN JUST SALT & CLAY.

Redmond Minerals has been in business since 1958, when two brothers decided to turn their Utah farm into something bigger. They tapped into an ancient deposit and found two rare resources—a salt with 60+ trace minerals crystallized inside each granule and a thick layer of volcanic ash—a mineral-rich supplement unlike any other clay.

Five decades later our business has expanded but we still haven't forgotten our founders' vision to keep things natural and put people before profit to make a contribution that matters.
