

LTL3500 RETROREFLECTOMETER

The LTL3500 is part of a new generation of DELTA retroreflectometer instruments for measuring retroreflection of road markings. The LTL3500 is especially suitable for persons who carry out programs with multiple measurements. The instrument software assists in structuring the measurements for easy overview when reviewing results.

- Modern and durable design
- User-friendly
- Small and lightweight
- Includes photo documentation

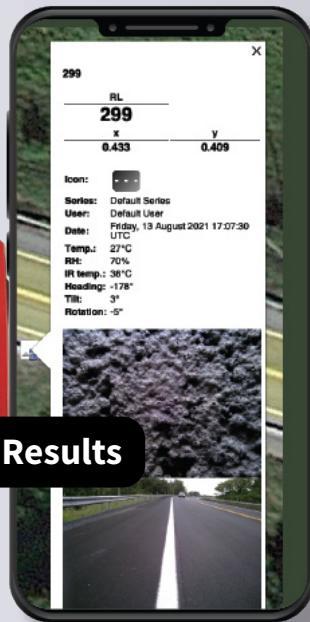

NEW! Photo Documentation

NEW! Lightweight Design

NEW! Easy Overview of Results

General features

- RL and Qd for dry & wet markings
- RL for continuous wetting
- Measurement time less than 1 sec for both RL and Qd
- Measures RL on profiled markings up to 15 mm / 0.6 inch
- Memory capacity 8GB
- Multi-lingual
- Average calculation
- Easy-readable color touch LED display with 3 buttons
- Long-life illumination system
- USB memory stick & Wi-Fi interface, IOT prepared
- Power supply, standard Bosch professional battery
- Shows and stores date, time, air temperature, marking temperature and humidity
- Facility for entering and storing road ID, user ID and other measurement related data
- Road Icon references
- Data presentation in Excel and Google Earth
- Stray light compensated
- Single handed operation, user-friendly
