

## CHRONIC OBSTRUCTIVE PULMONARY DISEASE (COPD) PROGRAM

According to the National Institute on Aging:

- COPD is one of the leading causes of hospitalizations in our local community and many of these hospitalizations can be prevented.
- There is no cure for COPD, only treatment.
- With proper management, however, most people with COPD can achieve good symptom control and quality of life.

## HOW EASYLIVING'S CHRONIC OBSTRUCTIVE PULMONARY DISEASE (COPD) PROGRAM WORKS:

- 1.) We will provide an in-home assessment by a professional care manager that reviews your level of risk and will make the necessary recommendations to keep you aging wisely.
- 2.) We will provide a trained care partner to provide the essential care needed to reduce your risk of falls and prevent unnecessary hospitalizations, such as:
  - **Vitals** - track and report any changes in blood pressure & weight
  - **ADLs** - Assisting with transfer - in/out of chair, to the restroom, in/out of bed
  - **Meal Preparation** - Assistance in preparing healthy meals & encouraging fluids to maintain a safe level of hydration
  - **Medication Assistance** - Remind and assist to ensure medication is taken within prescribed time and within physician orders
  - **Housekeeping** - Maintain a clean and safe home environment

## A CARE MANAGER WILL OVERSEE AND MANAGE CARE:

- **Clinical management** of chronic diseases (e.g., Dementia, Diabetes, CHF, COPD, Stroke)
- **Monitor signs & symptoms** of chronic illness exacerbation (e.g., signs of heart failure, vascular impairment)
- **Coach** the importance of healthy behaviors, like dietary and medication compliance, and the importance of monitoring indicators of disease progression like weight, glucose levels, or swelling in the extremities
- **Medication management** and working with doctors/pharmacists on medication reconciliation and coordination to ensure the patient is taking medications properly and reducing errors and side effects.
- **Provide recommendations** and resources to assist with increasing quality of life and reducing family stress
- **Managing** escalating behaviors in dementia patients

## PROVEN OUTCOMES

EasyLiving's hospitalization & rehospitalization rate for the previous 30 days is **1.41%** which is well below the national average of 15.6% & our local average of 15.9%.
