

OTS Software Solution

The New Standard in Freight Procurement

Are you still using costly brokers when your preferred carriers deny your loads? If so, you're stuck in a process that's more than 50 years old, and DFBs aren't much better.

Inefficient freight procurement leads to increased shipping costs, poor OTD, distribution bottlenecks, and unhappy end customers. It's time to update your process.

- Avoid costly brokers & **generate truckload savings** up to 20%.
- Source **immediate capacity** with 95.5%+ OTD.
- Access rate data, hidden by brokers, to **understand true market cost per lane**.
